PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Performed daily and periodic validation of external sponsor models, identifying anomalies such as zero-weight positions and model drift, and escalating issues to Investment or Operations teams.
- Oversaw account lifecycle activities including sponsor account setup reviews, liquidation monitoring, and reconciliation status validation, ensuring timely communication with trading and operations teams.
- Maintained the integrity of the security master by identifying missing or incorrect attributes and driving resolution with internal teams and external vendors, improving data accuracy by approximately **15%**.
- Defined and documented business requirements for operational enhancements and strategic initiatives, supporting testing and participating in go-live activities.
- Executed daily early-morning controls supporting daily market-open readiness, ensuring the timely availability of investment and account data.
- Analyzed business and data to identify anomalies and trends, partnering with Technology to implement automated controls and remediation solutions, reducing manual intervention by **20%**.
- Reviewed and maintained Operations workflows and procedural documentation, ensuring accuracy and audit readiness for cross-functional teams.

SKILLS

Data Management – Investment Data, Data Quality, Data Analysis, Security Master Data, Data Integrity

Investment Operations – Funds, Institutional Accounts, Separately Managed Accounts (SMAs), Trade Lifecycle, Account Lifecycle Management, Reconciliation

Analysis & Controls – Process Improvement, Control Frameworks, Risk Identification, Anomaly Detection, Root Cause Analysis, Exception Management

Technical Skills – SQL, Python, Bloomberg, Charles River, APL, Excel

Collaboration & Communication – Stakeholder Management, Cross-functional Collaboration, Business Requirements Documentation, Vendor Management

PROJECTS

Investment Data Quality Initiative

- Developed Python scripts to automate the validation of security master data against external vendor feeds, identifying and correcting approximately **500** data discrepancies per quarter.
- Built SQL queries to perform deep-dive analysis on transaction data, uncovering root causes for reconciliation breaks and proposing process improvements to reduce exceptions by **18%**.
- Collaborated with operations analysts to document and refine data quality control procedures, ensuring adherence to audit requirements and enhancing overall data integrity.

Operational Process Streamlining for Account Management

- Designed and implemented an automated workflow for monitoring sponsor account liquidation, reducing manual review time by **30%** and ensuring timely escalation of potential issues.
- Created interactive dashboards in **Power BI** to visualize account lifecycle status and identify bottlenecks, providing actionable insights to operations managers.
- Mapped existing account setup processes and identified gaps, leading to the documentation of streamlined procedures that improved onboarding efficiency for new institutional clients.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
