PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Assisted Manufacturing Engineers in troubleshooting and standardizing production methods for a **medical device client**, focusing on **mechanical systems**.
- Executed systematic root cause analysis on recurring equipment failures, implementing corrective actions that reduced unscheduled downtime by **15%**.
- Managed yield targets on an hourly basis, analyzing trends to identify and implement process improvements that consistently achieved required yield.
- Performed preventative and corrective maintenance on production machinery, meticulously completing all associated **paperwork and records**.
- Contributed to electronic troubleshooting and hardware interfacing for **PLC-controlled automated systems** within a manufacturing facility.
- Supported Manufacturing Engineers in the investigation and implementation of new production methodologies, focusing on **process optimization**.
- Containerized core Java services using **Docker** and deployed them to **AWS EC2** instances, enhancing deployment consistency across development and production environments.

SKILLS

Manufacturing & Process – Process Improvement, Yield Management, Root Cause Analysis, Preventative Maintenance, Corrective Maintenance, Production Methods

Engineering & Technical – Mechanical Troubleshooting, Electronic Troubleshooting, PLC Programming, Hardware Interfacing, System Standardization

Software & Tools – Microsoft Excel, Microsoft Office Suite, Jira, Confluence, Git

Cloud & Containerization – AWS EC2, Docker

Data Analysis & Reporting – Data Analysis, Trend Analysis, Reporting

PROJECTS

Automated Production Line Optimization

- Developed Python scripts to analyze sensor data from a **manufacturing production line**, identifying bottlenecks that impacted throughput by up to **20%**.
- Collaborated with the operations team to implement process adjustments based on data analysis, leading to a sustained improvement in **output efficiency**.
- Created automated reports in **Python** summarizing daily production metrics, reducing manual reporting time by approximately 5 hours per week.

Equipment Maintenance & Reliability Dashboard

- Designed and built a **Power BI dashboard** to visualize preventative and corrective maintenance schedules and completion rates for critical machinery.
- Integrated data from maintenance logs and sensor readings to provide insights into equipment reliability trends, highlighting components with a **30% higher failure rate**.
- Presented dashboard findings to the engineering and maintenance teams, facilitating data-informed decisions for optimizing maintenance strategies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
