PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided timely and accurate technical support for a SaaS work execution platform, resolving customer inquiries via written communication and calls within established SLAs.
- Troubleshot product behavior and complex customer workflows across web and mobile applications, distinguishing configuration issues from potential defects through systematic investigation.
- Managed the EMEA customer support queue, prioritizing requests by business impact and urgency while maintaining detailed case records and informing customers of progress.
- Served as a continuity partner for strategic accounts, learning their unique configurations and critical workflows to track open cases and coordinate follow-up with Customer Success Managers.
- Escalated complex issues with comprehensive evidence, including customer impact, affected users, reproduction steps, and prior testing, maintaining ownership of customer communication throughout specialist investigations.
- Developed and improved internal knowledge base articles and troubleshooting guides based on recurring customer questions and product issues, feeding insights back to Product and Engineering teams.
- Participated in daily handoffs with the North American support team, highlighting urgent cases and documenting investigation findings to ensure seamless work continuity across time zones.

SKILLS

Support Tools – Intercom, Zendesk, Linear, Jira, Confluence

Operating Systems – Linux, Windows

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Programming Languages – Python, Java, SQL, Shell Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Methodologies – Agile, Scrum, ITIL

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Enterprise SaaS Platform Support Enhancement

- Designed and implemented improved troubleshooting guides for a complex SaaS platform, reducing average ticket resolution time by 18% for common issues.
- Developed Python scripts to automate the generation of diagnostic reports from system logs, streamlining the evidence-gathering process for escalated tickets.
- Collaborated with a senior support engineer to refine the escalation process, ensuring clearer documentation of customer impact and reproduction steps for specialized teams.

Customer Workflow Analysis for Operations Dashboard

- Analyzed transaction monitoring data and reconciliation workflows for a financial-services operations dashboard, identifying patterns in failed payment messages.
- Created SQL queries to extract and validate data related to payment processing flows, supporting root cause analysis for operational alerting.
- Contributed to the development of a Python ETL process to aggregate operational metrics for reporting, improving visibility into system performance for business analysts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
