PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided first-line support for a suite of **SAP Application Products**, resolving IT Incidents and Service Requests for internal employees.
- Managed incoming IT Incidents and Service Requests by accurately logging, qualifying, and prioritizing tickets within the organization's **ticketing system**.
- Contributed to the **Knowledge Base** by documenting resolutions for common issues, reducing escalation dependency by approximately 15% for recurring problems.
- Collaborated with next-level support teams to escalate complex application issues, ensuring detailed handovers and facilitating prompt resolution.
- Actively monitored ticket queues and utilized **dashboards** to track ticket statuses, ensuring progression within defined SLA targets.
- Adhered to established security policies and data privacy regulations while handling sensitive employee information and resolving support tickets.
- Maintained clear and professional communication with users regarding ticket status, providing timely updates and managing expectations for application support.

SKILLS

Application Support – IT Incidents, Service Requests, Ticket Management, Knowledge Base, SLA Compliance, Escalation, Troubleshooting

SAP Products – Sales and Marketing, Finance Travel, HR, Time Recording, Internal Portal Systems

Tools & Technologies – Jira, Confluence, Splunk, Dynatrace, AWS CloudWatch, Jenkins, Git, Linux Shell Scripting

Programming Languages – Java, Python, SQL

Databases – PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda)

Methodologies – Agile, Scrum

PROJECTS

Internal Application Support Dashboard

- Developed a dashboard using **Power BI** to visualize ticket trends and SLA compliance for internal application support, enabling proactive issue identification.
- Created SQL queries to extract and aggregate data from the **ticketing system**, feeding into the Power BI dashboard for real-time reporting.
- Collaborated with operations teams to define key metrics and reporting requirements for the support dashboard, ensuring alignment with business needs.

Python Automation for Production Monitoring

- Authored **Python scripts** to automate log analysis and alert generation from Splunk and CloudWatch outputs for enterprise applications.
- Implemented scheduled reporting using Python to summarize P1/P2 incident impact and resolution times, delivered weekly to management.
- Containerized automation scripts using **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
