PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented automated data processing and reporting workflows using **Python scripting**, reducing manual intervention by approximately **40%** for routine financial reports.
- Managed and troubleshot production environments for enterprise financial services applications, ensuring adherence to strict SLAs through proactive monitoring with **Splunk** and **Dynatrace**.
- Developed and maintained **Java Spring Boot** REST APIs to support cross-system integrations, facilitating data exchange between core banking platforms and operational dashboards.
- Collaborated with business analysts and operations teams to gather client requirements for reporting enhancements, translating them into technical specifications for the payments operations dashboard.
- Coordinated change management processes for system configuration updates and UAT execution across interconnected enterprise business systems, ensuring smooth post-go-live transitions.
- Contributed to the development of a payments operations dashboard, focusing on transaction flow monitoring and operational alerting for failed payment messages, supporting a global financial services client.
- Containerized Java Spring Boot applications using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and simplifying environment management.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query

Financial Services Tools – Payments Operations Dashboard, Transaction Monitoring, Reconciliation Workflows

Enterprise Systems – ERP Integration Support, Change Management

PROJECTS

Automated Financial Reporting Pipeline (HCL Technologies)

- Developed a **Python ETL pipeline** to extract, transform, and load data from multiple PostgreSQL and Oracle databases into a centralized data warehouse for reporting.
- Implemented scheduled reporting jobs using **Cron** and shell scripting on Linux, automating the generation and distribution of weekly financial summaries to operations teams.
- Designed and built interactive **Power BI dashboards** to visualize key performance indicators and trends derived from the processed financial data, enabling faster stakeholder decision-making.

Payments Transaction Monitoring Service (HCL Technologies)

- Engineered a Java Spring Boot microservice to ingest and process inbound transaction messages from various financial streams, performing real-time validation and enrichment.
- Integrated the service with a **PostgreSQL** database for persistent storage of transaction status and audit trails, ensuring data integrity and compliance with regulatory requirements.
- Developed alerting mechanisms within the service to flag and notify operations teams of failed or stalled payment messages, reducing average resolution time by approximately **15%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
