HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed security events and threat intelligence feeds to identify and assess risks, leading to the implementation of **15 targeted mitigation strategies** for enterprise applications.
- Evaluated existing cybersecurity controls and documented findings for **policy enhancements**, contributing to a new framework for enterprise security capabilities.
- Participated in incident investigations, performing **root cause analysis** on escalated security alerts to strengthen organizational resilience and prevent recurrence.
- Developed **Python scripts** to automate the analysis of security logs, reducing manual review time for low-severity events by an estimated **30%**.
- Collaborated with cloud and application teams to integrate security best practices into the **Software Development Life Cycle (SDLC)**, supporting security tooling within **CI/CD pipelines**.
- Assisted in analyzing identity and access management processes, contributing to the design of improved **access governance** controls for critical systems.
- Containerized security analysis tools using **Docker** and managed their deployment on **AWS EC2** instances, ensuring consistent environments for security operations.

SKILLS

Languages – Python, Bash, JavaScript, SQL

Security Concepts – Cybersecurity Analysis, Vulnerability Management, Threat Intelligence, Risk Assessment, Incident Response, Root Cause Analysis, Identity and Access Management, SDLC Security, CI/CD Security

Tools & Technologies – Splunk, CloudWatch, Dynatrace, Jenkins, Git, Jira, Confluence, AWS (EC2, S3, Lambda, CloudWatch), Docker

Operating Systems – Linux, Windows

Methodologies – Agile, Scrum

PROJECTS

Security Event Analysis Automation (HCL Technologies)

- Developed Python scripts to parse and analyze security logs from various sources (e.g., application logs, network traffic), automating the detection of common attack patterns.
- Implemented data enrichment techniques within the script to add context to security events, such as correlating IP addresses with threat intelligence feeds, improving alert accuracy by **~20%**.
- Engineered a modular script architecture that allowed for easy addition of new detection rules and log parsers, enhancing the overall efficiency of the security operations team.

Vulnerability Assessment and Reporting Tool (MSc Project)

- Created a Python-based tool to automate the process of scanning for known vulnerabilities in software components using publicly available databases.
- Designed a reporting module that generated summaries of identified vulnerabilities, categorized by severity and potential impact, for use in project risk assessments.
- Integrated findings into a simple dashboard prototype, visualizing the most critical vulnerabilities across a simulated application stack.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
