PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Implemented and maintained **security controls** across **cloud** and **on-premises platforms**, ensuring adherence to enterprise security standards and least-privilege principles.
- Analyzed **security alerts**, investigated suspicious activity, and supported **incident response** efforts using enterprise security monitoring and telemetry tools like **Splunk**.
- Assisted with **vulnerability management** by validating findings, coordinating remediation with infrastructure teams, and tracking issues through to resolution across distributed systems.
- Reviewed network access requests and connectivity requirements, ensuring adherence to **least-privilege principles** and secure communication flows.
- Evaluated **network traffic** and communication protocols to identify security risks and contribute to secure network design and segmentation strategies.
- Supported **compliance** and **audit activities** by preparing evidence, assessing control effectiveness, and identifying areas for improvement in production environments.
- Developed **Python scripts** to automate operational tasks and enhance the efficiency of security monitoring and data collection processes.

SKILLS

Cloud Security – Cloud Security Controls, Hybrid Cloud Security, On-Premises Security, Security Monitoring, Telemetry

Networking – TCP/IP, Routing, Switching, DNS, HTTP, Network Traffic Analysis, Network Protocols, Network Segmentation

Security Operations – Incident Response, Vulnerability Management, Alert Analysis, Suspicious Activity Investigation, Compliance, Audit Support, Risk Assessment

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Operating Systems – Windows, Linux

Scripting & Automation – Python, Shell Scripting

Tools & Technologies – Firewalls, IDS/IPS, VPNs, Splunk, Jenkins, Git, Jira, Confluence

PROJECTS

Enterprise Cloud Security Monitoring Enhancement

- Designed and implemented enhanced security monitoring using **AWS CloudWatch** and **Splunk** to detect anomalous network traffic patterns and potential security threats.
- Developed **Python scripts** to automate the ingestion and analysis of security logs, reducing manual review time by approximately **30%** for critical alerts.
- Configured **network segmentation** rules and firewall policies within an AWS VPC environment to enforce granular access controls and isolate sensitive systems.

Secure Network Access Control Automation

- Developed automated workflows using **Python** and **Jira** APIs to streamline the review and approval process for network access requests, ensuring adherence to least-privilege principles.
- Integrated security validation checks into the access request pipeline, flagging requests with overly broad permissions for further review, processing an average of **15 requests** per week.
- Contributed to the hardening of **Linux** server configurations by developing scripts to enforce security baselines and validate compliance with organizational standards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
