PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided **day-to-day operational support** for core financial systems, triaging and resolving P1/P2 incidents within strict SLA targets.
- Developed **Python scripts** to automate ETL processes for daily operational reporting, reducing manual effort by approximately **15 hours per week**.
- Authored **Java Spring Boot** code to implement new REST APIs for data exchange between internal services, enhancing system interoperability.
- Managed **application onboarding initiatives** for new systems into the team's platform environment, ensuring smooth integration and operational readiness.
- Drove **process improvements** by automating manual tasks within the support workflow, leading to an estimated **20% reduction** in ticket resolution times for common issues.
- Collaborated with cross-functional teams to **deliver end-to-end support** for projects impacting Middle Office and Operations systems.
- Managed **AWS cloud infrastructure**, including EC2 instances and S3 buckets, supporting the deployment and monitoring of core applications.

SKILLS

Core Technologies – Python, Java, SQL, Spring Boot, REST APIs, AWS.

Cloud & DevOps – EC2, S3, Lambda, CloudWatch, Docker, Jenkins, Git.

Databases – PostgreSQL, MySQL, Oracle.

Monitoring & Support – Splunk, Dynatrace, Jira, Confluence, Incident Response, SLA Management.

Data Analytics & BI – Power BI, Tableau, R, pandas, NumPy, scikit-learn.

Financial Domain – Payments Operations Dashboard, Transaction Monitoring, Reconciliation Workflows, ERP Integration Support.

PROJECTS

Automated Transaction Monitoring System

- Engineered a **Python-based system** to parse and monitor high-volume financial transaction data streams, identifying and alerting on anomalies in near real-time.
- Developed **SQL queries** against PostgreSQL to extract and validate transaction data, ensuring data integrity for downstream reconciliation processes.
- Implemented automated error reporting and **dashboard updates** for operational teams using a combination of scripting and basic data visualization.

Internal API for System Integration

- Designed and built a **Java Spring Boot REST API** to facilitate data synchronization between an enterprise ERP system and a financial operations dashboard.
- Wrote comprehensive **JUnit tests** to ensure API reliability and adherence to contract specifications, achieving **85% code coverage**.
- Containerized the application using **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
