HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented robust **Linux kernel tuning** parameters for memory management and I/O performance on high-throughput database servers, reducing average query latency by **18%**.
- Developed **Python scripts** to automate system health checks and log analysis across a fleet of 500+ servers, decreasing manual intervention time by approximately **15 hours** per week.
- Architected and deployed **containerized applications** using **Docker** and **Kubernetes (EKS)**, managing resource allocation and scaling strategies for mission-critical services.
- Provided expert guidance to top-tier partners on **standard methodologies** for running large-scale database systems, ensuring optimal performance and reliability.
- Collaborated with **product management** and development teams to translate partner feedback into actionable improvements for the database platform.
- Mentored and onboarded three new engineers to the technical services team, focusing on **advanced diagnostics** and complex issue resolution for the database ecosystem.
- Analyzed and troubleshot complex issues holistically, tracing problems from the application tier down to the **storage subsystem** and network layer.

SKILLS

Databases – MongoDB, PostgreSQL, MySQL, Oracle, RDBMS, NoSQL

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

Operating Systems & Networking – Linux performance tuning, memory management, I/O, configuration, security, DNS, TCP/IP, SSL/TLS

Programming & Scripting – Python, Java, Node.js, Go, Ruby, C++, JavaScript

Containerization & Orchestration – Docker, Kubernetes, EKS

Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum, PagerDuty, Datadog, Grafana

PROJECTS

Distributed Database Performance Optimization (HCL Technologies)

- Engineered a series of **Python scripts** to benchmark and profile database performance under simulated high-load conditions, identifying bottlenecks in query execution plans.
- Implemented **advanced Linux tuning** and **PostgreSQL configuration adjustments**, resulting in a sustained **22%** improvement in p95 transaction processing times for a key financial services dashboard.
- Developed automated reporting using **shell scripting** to track key performance indicators and alert operations teams to potential system degradation.

Partner Integration Framework for Scalable Databases

- Designed and built a modular framework in **Java Spring Boot** to facilitate seamless integration of third-party applications with a large-scale NoSQL database.
- Integrated **SSL/TLS** for secure data transfer between partner systems and the database cluster, meeting stringent security requirements for enterprise clients.
- Authored comprehensive technical documentation and provided post-integration support to three key partners, ensuring successful adoption of the framework.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
