HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **mission-critical Android applications** for public-safety communication, focusing on **Kotlin-first development** and Android SDK best practices.
- Implemented resilient, **offline-capable mobile solutions** with robust data synchronization and conflict-handling strategies for operation in degraded network environments.
- Built modern Android user interfaces using **Jetpack Compose**, ensuring usability for high-stress operational workflows and integrating with **backend systems** via **REST** and event-driven APIs.
- Contributed to the design and maintenance of **scalable, modular architectures** (e.g., MVVM, Clean Architecture) for large, multi-feature applications, promoting engineering excellence.
- Integrated with a variety of hardware-adjacent APIs including **Bluetooth**, GPS/location services, and background services to enhance device functionality and data capture.
- Optimized application performance for **battery efficiency** and reliability under continuous operational use, diagnosing and resolving field issues with root-cause analysis and durable fixes.
- Supported **CI/CD pipelines** and release automation for deployed mobile applications, contributing to automated testing, reliability validation, and quality gates.

SKILLS

Mobile Development – Android SDK, Kotlin, Jetpack Compose, MVVM, Clean Architecture, WorkManager, Lifecycle, Navigation

Backend Integration – REST APIs, Retrofit, OkHttp, Ktor, Event-driven APIs, Real-time messaging

Device & Hardware – Bluetooth, GPS, Location Services, Background Services, Sensors

Development Practices – Agile/Scrum, Git, Unit Testing, Integration Testing, Instrumentation Testing, Secure Coding, Performance Optimization

Cloud & DevOps – AWS, CI/CD, Jenkins, Docker

PROJECTS

Secure Android Communication App

- Developed a secure Android application using **Kotlin** and **Jetpack Compose** for real-time communication with public safety networks.
- Implemented robust **offline data synchronization** and caching mechanisms to ensure data availability during intermittent connectivity, processing over **500 transactions** per user session without data loss.
- Integrated with custom **Bluetooth** protocols for device-to-device communication, ensuring reliable data transfer in field environments.

Android LMR Network Monitoring Tool

- Engineered an Android application to monitor Land Mobile Radio (LMR) network status and performance using **Android SDK** and **REST APIs**.
- Designed a modular architecture with **ViewModel** and **Lifecycle** components to handle real-time data streams from backend services, displaying over **20 key network health indicators**.
- Applied **secure coding practices** and implemented certificate-based authentication for accessing sensitive network telemetry data.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
