PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Authored **Java Spring Boot** microservices for secure API endpoints, implementing granular access controls and input validation to mitigate common web vulnerabilities.
- Developed and maintained **Python scripts** for automating security scans and vulnerability reporting, reducing manual analysis time by approximately **40%**.
- Implemented **SAST and SCA tooling** across multiple application repositories, identifying and flagging over **200+ critical code-level security risks** prior to deployment.
- Conducted **threat modeling** sessions for new application architectures, collaborating with development teams to proactively integrate security controls and design secure-by-default solutions.
- Executed **penetration tests** on internally developed web applications and REST APIs, simulating real-world attack vectors to uncover security defects and validate remediation efforts.
- Assessed the security posture of **third-party vendor applications** through detailed configuration reviews and hardening analysis, ensuring alignment with enterprise security standards.
- Containerized security scanning tools using **Docker** and integrated them into **Jenkins CI/CD pipelines** for automated security checks during the software development lifecycle.

SKILLS

Application Security – SAST, SCA, DAST, Threat Modeling, Penetration Testing, Code Review, Security Controls, API Security, SDLC

Languages – Python, Java, JavaScript, .NET

Tools – Burp Suite, OWASP Zap, Snyk, Veracode, Checkmarx, GitLab, GitHub, Jira, Docker, Jenkins, Splunk, Dynatrace

Cloud – AWS (WAF, Cognito), Kubernetes

APIs – REST, GraphQL

Methodologies – Agile, Scrum, Purple Teaming

PROJECTS

Automated API Security Testing Framework

- Developed a **Python-based framework** to automate dynamic application security testing (DAST) against **REST APIs**, integrating with **OWASP Zap** for vulnerability detection.
- Designed the framework to generate detailed reports on identified security flaws, including SQL injection, XSS, and insecure direct object references, for **development team remediation**.
- Integrated the automated testing suite into a **Jenkins CI/CD pipeline**, enabling security checks on every code commit and reducing manual testing effort by an estimated **60%**.

Secure SDLC Implementation for Enterprise Applications

- Collaborated with development teams to embed security practices throughout the **Software Development Life Cycle (SDLC)**, focusing on a **secure-by-design** approach.
- Implemented and configured **Snyk** for static code analysis and dependency vulnerability scanning across multiple Java and Python codebases, identifying and prioritizing over **150 vulnerabilities**.
- Provided direct security guidance and remediation advice to engineers, conducting hands-on **code reviews** and assisting in the resolution of identified security defects.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
