HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented control logic for industrial automation systems using **PLC programming**, focusing on optimizing process flow for a regional manufacturing client.
- Developed **SCADA system** configurations and graphical interfaces for real-time operational monitoring and control of critical infrastructure.
- Authored comprehensive **technical documentation**, including system design specifications and user manuals, for automation projects delivered to enterprise customers.
- Collaborated with customer engineering teams to gather requirements for control system upgrades, ensuring alignment with operational objectives and site constraints.
- Participated in site **commissioning and testing** of automation solutions, performing on-site diagnostics and system validation to ensure seamless integration.
- Managed **change control processes** for system configurations and software updates within a regulated production environment, ensuring audit trail integrity.
- Containerized automation software components using **Docker** for consistent deployment across development, testing, and on-site environments.

SKILLS

Industrial Automation – PLC, SCADA, HMI, Control Systems, Instrumentation, DCS

Programming Languages – Ladder Logic, Structured Text, C, Python

Software & Tools – Rockwell Studio 5000, Siemens TIA Portal, Ignition SCADA, Wonderware, Aveva, Git, Jira, Confluence

Cloud & Infrastructure – AWS, Docker, Linux, Shell Scripting

Data & Analytics – SQL, Power BI, DAX, Data Modelling, ETL

Engineering Principles – Electrical Engineering, Mechanical Engineering, Process Control, System Integration

PROJECTS

Automated Batch Processing System for Pharma Manufacturing

- Developed PLC code (Ladder Logic) and HMI screens for an automated batch processing system used in pharmaceutical manufacturing, ensuring adherence to strict GxP guidelines.
- Engineered data logging and reporting functionalities using Python scripts to extract operational parameters and generate weekly performance summaries for the client.
- Integrated the system with an existing **SCADA platform**, enabling real-time visualization of batch progress and alarm management for the operations team.

Energy Infrastructure Monitoring Dashboard

- Designed and built a **Power BI dashboard** to visualize real-time operational data from an energy infrastructure client, consolidating metrics from multiple sensor inputs.
- Developed **DAX measures** to calculate key performance indicators, including energy output, system availability, and fault detection rates.
- Collaborated with the operations team to refine dashboard requirements, ensuring critical alerts and performance trends were easily accessible.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
