PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **PLC-based control systems** for a regulated life sciences manufacturing environment, ensuring adherence to safety and quality standards.
- Supported the analysis of scope changes for automation projects, preparing documentation on potential **schedule and cost impacts** for senior engineering review.
- Contributed to the definition and compilation of automation project requirements, aligning technical specifications with **project planning and maintenance strategies**.
- Collaborated with cross-functional teams, including automation, electrical, and IT engineers, to communicate workflow priorities and project deliverables effectively.
- Assisted in evaluating system reliability and identifying requirements for **upgrades and lifecycle management** of industrial automation solutions.
- Maintained and supported automation systems within both modernised and legacy manufacturing settings, focusing on **equipment control systems**.
- Developed Python scripts to automate data collection and reporting for operational metrics, reducing manual effort by approximately **35%** for the site's engineering team.

SKILLS

Automation & Control – PLC, Industrial Automation, Control Systems, Manufacturing Environments, Process Engineering

Engineering & Documentation – Engineering Drawings, Technical Documentation, Project Planning, Scope Management, Quality Systems, Regulatory Compliance

Software & Scripting – Python, Shell Scripting, Data Analysis

Manufacturing Domain – Life Sciences Manufacturing, Pharmaceutical, Biotech, Medical Device, FDA, ISO

Core Engineering Skills – Attention to Detail, Team Collaboration, Communication Skills, Problem-Solving

PROJECTS

Manufacturing Automation System Upgrade (HCL Technologies)

- Supported the upgrade of legacy manufacturing automation systems, integrating new **PLC control logic** with existing plant infrastructure.
- Assisted in defining requirements for system enhancements, ensuring compliance with **FDA and ISO quality standards** for regulated environments.
- Documented system configurations and operational procedures, contributing to the creation of updated **technical documentation** for the client's engineering team.

Production Data Automation Pipeline (HCL Technologies)

- Developed Python scripts to automate the extraction and transformation of production data from various sources, streamlining data availability for analysis.
- Built automated reporting routines that generated weekly summaries of key operational performance indicators, reducing report generation time by approximately **40 hours per quarter**.
- Implemented data validation checks within the Python scripts to ensure the integrity and accuracy of processed production data before it was made available.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
