PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Configured and deployed network devices across a distributed healthcare estate, ensuring seamless integration with existing data, wireless, and telephony infrastructure.
- Responded to and resolved network incidents, performing root cause analysis for issues impacting clinical and business services, and managing escalations to senior engineers.
- Assisted in the deployment of new network equipment, including routers, switches, and wireless access points, adhering to strict deployment schedules and maintenance windows.
- Monitored network performance and health using enterprise-grade observability tools, proactively identifying potential bottlenecks and service degradations across diverse sites.
- Collaborated with clinical and non-clinical staff to gather requirements for network service improvements and troubleshoot end-user connectivity issues, maintaining a customer-focused approach.
- Maintained comprehensive documentation for network configurations, incident resolution procedures, and equipment deployment processes, contributing to improved team knowledge sharing.
- Executed planned maintenance tasks on network infrastructure, including firmware updates and configuration backups, to ensure system stability and adherence to operational best practices.

SKILLS

Networking Fundamentals – TCP/IP, Switching, Wireless (Wifi), Network Infrastructure, Routers, Access Points

Operating Systems – Linux, Shell Scripting

Cloud & Virtualization – AWS (EC2, CloudWatch)

Containerization – Docker

Scripting & Automation – Python, Bash

Monitoring & Observability – Splunk, Dynatrace

Development Tools – Git, Jenkins, Jira, Confluence

PROJECTS

Enterprise Network Infrastructure Upgrade

- Managed the rollout of new network switches and routers across 15 regional offices, ensuring minimal disruption to ongoing operations.
- Configured VLANs and QoS policies to optimize traffic flow for critical business applications, improving data transmission efficiency by approximately 18%.
- Developed Python scripts to automate the initial configuration of new network devices, reducing deployment time per device by 30%.

Wireless Network Expansion and Security Hardening

- Designed and implemented a new enterprise-wide Wi-Fi network, supporting over 5,000 concurrent user devices across multiple campuses.
- Integrated WPA3 encryption and network access control (NAC) solutions to enhance wireless security posture, mitigating unauthorized access attempts.
- Performed site surveys and optimized Access Point placement to ensure consistent signal strength and coverage, addressing ~95% of reported dead zones.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
