PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed daily operational client queries for investment data, including transactions, valuations, and income/expense items, ensuring timely data entry to support client reporting needs.
- Supported the preparation of investment reconciliations across cash, positions, and transactions, performing initial reviews for alternative investment metrics such as unfunded commitments.
- Assisted in training new partners on accounting and operational workflows within the Front Office Solutions team, contributing to team knowledge transfer and operational efficiency.
- Collaborated with internal stakeholders and client solutions partners to research and resolve data challenges for institutional clients, contributing to the development of holistic data sets.
- Supported client onboarding initiatives, participating in discovery sessions, project planning, and setting client expectations to facilitate a smooth integration process.
- Developed Python scripts to automate data extraction and transformation tasks for reconciliation reports, reducing manual processing time by approximately **30%**.
- Containerized Java Spring Boot microservices for financial data processing using **Docker**, deploying to **AWS EC2** instances managed via **Jenkins** CI/CD pipelines.

SKILLS

Investment Operations – Investment Data Management, Transaction Entry, Valuation, Reconciliations, Performance Measurement, Alternative Investments, Client Onboarding, Operational Queries

Programming Languages – Java, Python, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy

Cloud & DevOps – AWS (EC2, S3, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Jira, Confluence, Agile, Scrum, Microsoft Suite

PROJECTS

Investment Data Aggregation Platform

- Engineered a Python-based data pipeline to ingest and standardize diverse investment data feeds from multiple external sources, processing over 15,000 records daily.
- Developed RESTful APIs using **Java Spring Boot** to expose aggregated and validated data to downstream portfolio management tools, supporting real-time analytics for institutional clients.
- Implemented robust data validation checks and error handling within the pipeline, reducing data discrepancy issues reported by operations teams by **22%**.

Client Reporting Automation Suite

- Automated the generation of monthly performance and exposure reports for institutional clients using Python and SQL against a PostgreSQL database, cutting report generation time from 3 days to 4 hours.
- Designed and implemented interactive dashboards using **Power BI** to visualize key client portfolio metrics, enabling stakeholders to quickly identify trends and potential risks.
- Collaborated with business analysts to gather requirements for reporting enhancements, translating complex needs into technical specifications for report generation logic.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
