PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Coordinated client FIX onboarding activities, documenting specific requirements for order, execution, and allocation workflows and mapping FIX message fields for **15+ complex implementations**.
- Developed and maintained business requirements, functional specifications, and process flows for product initiatives, ensuring clear communication to technology and operational partners **across 3 product teams**.
- Supported the delivery and ongoing management of brokerage products and client connectivity, acting as a liaison between clients, Sales, Trading, Operations, and Technology teams.
- Facilitated working sessions across business and technology teams to coordinate project milestones and testing dates, ensuring adherence to agreed implementation schedules for **over 10 client integrations**.
- Investigated and resolved product implementation and maintenance issues, gathering supporting information and coordinating solutions with relevant business and technology teams, reducing average ticket resolution time by **18%**.
- Contributed to product risk assessments and application governance activities, including maintaining accurate onboarding documentation, requirements, and status updates for **assigned brokerage products**.
- Containerized Java Spring Boot microservices for the internal feature store using **Docker** and deployed them to an **AWS EKS** cluster, ensuring efficient resource utilization and predictable rollouts.

SKILLS

Core Competencies – FIX Protocol, Client Onboarding, Product Delivery, Business Analysis, Stakeholder Management, Project Coordination, Agile Methodologies.

Programming Languages – Java, Python, SQL.

Frameworks & Libraries – Spring Boot, Hibernate, pandas, NumPy, scikit-learn, Flask, FastAPI.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux.

Databases – PostgreSQL, MySQL, Oracle.

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau.

PROJECTS

Client Connectivity & FIX Workflow Implementation

- Designed and documented FIX connectivity requirements for enterprise clients, including order, execution, and allocation message flows, mapping custom identifiers and fields for **8 pilot implementations**.
- Developed Python scripts to automate the generation of FIX configuration files based on client-specific requirements, reducing manual configuration errors by an estimated **30%**.
- Collaborated with internal FIX connectivity teams and client technical leads to resolve integration issues during testing phases, ensuring successful end-to-end trade processing validation.

Java-based Transaction Reconciliation Service

- Engineered a Java Spring Boot service to process and reconcile financial transaction data from multiple sources, ensuring data integrity and compliance with internal audit standards.
- Implemented RESTful APIs for data ingestion and retrieval, achieving p95 latencies of **150ms** under simulated peak loads of 1,500 requests per minute.
- Integrated the service with a PostgreSQL database using Hibernate, managing entity mappings and optimizing query performance for large datasets, improving report generation times by **22%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
