PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed vulnerability scan results from **infrastructure**, **cloud**, and **container environments**, identifying over 2,000 high-severity findings across enterprise assets.
- Assessed emerging vulnerabilities and CVEs, correlating them with threat intelligence feeds to determine organizational exposure and impact on critical systems.
- Prioritized vulnerability remediation efforts by integrating CVSS scores with **exploitability data**, **threat actor TTPs**, and business asset criticality, reducing backlog by **38%** in Q1.
- Collaborated with **Security Operations**, **Threat Intelligence**, and **Cloud Security** teams to define remediation strategies and track progress against defined SLAs.
- Supported validation of remediation activities by performing targeted re-scans and security assessments, confirming closure of **95%** of critical vulnerabilities within agreed timelines.
- Identified and assessed potential **attack paths** and security weaknesses across the enterprise, contributing to continuous threat exposure management initiatives.
- Developed and maintained **production runbooks** and incident response playbooks for the vulnerability management platform, improving team response time for critical alerts by **15%**.

SKILLS

Vulnerability Management – Vulnerability Scanning, CVE Analysis, CVSS, Threat Intelligence, Exploitability, Attack Paths, Remediation Prioritization

Security Operations – Security Monitoring, Incident Response, SIEM (Splunk), Observability (Dynatrace)

Cloud Security – AWS (EC2, S3, CloudWatch), Azure, Google Cloud, Container Security (Docker)

Infrastructure – Linux, Shell Scripting, Network Security, Enterprise Environments

Programming & Scripting – Python, Java, SQL

Collaboration Tools – Jira, Confluence, Git

PROJECTS

Enterprise Vulnerability Assessment and Remediation Platform

- Designed and implemented a data pipeline using **Python** to ingest vulnerability scan data from multiple sources (e.g., Qualys, Nessus) into a central PostgreSQL database.
- Developed **SQL** queries and scripts to analyze vulnerability trends, identify common attack vectors, and generate executive-level reports on risk posture for stakeholders.
- Integrated threat intelligence feeds to enrich vulnerability data, enabling more accurate prioritization based on active exploitation and known adversary TTPs.

Cloud Security Posture Management Automation

- Automated security configuration checks for **AWS** resources (EC2, S3 buckets, IAM policies) using **Python** scripts and AWS CloudWatch logs.
- Developed alerts for misconfigurations and policy violations, reducing the mean time to detect compliance drift by **40%**.
- Containerized security automation tools with **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
