PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Hardened identity and access management controls for **Okta** and **Google Workspace** by implementing phishing-resistant MFA and ensuring SCIM lifecycles, reducing unauthorized access attempts by an estimated **40%**.
- Managed the endpoint security program across a macOS-first fleet, deploying and configuring **EDR** and **MDM** solutions to enforce baseline security configurations.
- Developed Python scripts to automate access reviews and manage onboarding/offboarding processes, reducing manual effort by **60%** and ensuring timely deprovisioning.
- Secured AI tool usage at the endpoint by implementing governance policies for large language models and detecting risky AI service access, preventing potential data exfiltration events.
- Reduced SaaS risk by implementing **SSPM** tooling and custom automation to detect risky OAuth grants and configuration drift across various vendor applications.
- Partnered with Detection & Response teams to ensure corporate systems generated necessary telemetry for detecting identity, endpoint, and SaaS abuse, improving incident visibility by **35%**.
- Wrote production-quality automation scripts in **Python** and deployed infrastructure-as-code using **Terraform** for security configuration management.

SKILLS

Identity & Access Management – Okta, Google Workspace, SAML, OIDC, OAuth 2.0, SCIM, MFA

Endpoint Security – macOS, Windows, ChromeOS, MDM, EDR

SaaS Security – SSPM, OAuth Governance, Audit Logging, Shadow IT

Automation & Scripting – Python, Bash, Terraform, Infrastructure-as-Code

Cloud Security – AWS, GCP, Azure

AI Security – LLM Governance, AI Agents, Model Context Protocol (MCP)

PROJECTS

Automated Access Review and Provisioning System

- Engineered a Python-based system to automate user access reviews across critical SaaS applications, integrating with identity providers to ensure least-privilege access.
- Developed Terraform modules to manage security group configurations and enforce network access policies within an AWS environment, reducing misconfigurations by **50%**.
- Created automated workflows for user onboarding and offboarding, generating audit evidence and reducing manual processing time by approximately **70%**.

Endpoint Security Baseline Enforcement

- Designed and implemented configuration baselines for macOS endpoints using an MDM solution to enhance security posture and meet compliance requirements.
- Integrated EDR tooling to provide real-time threat detection and response capabilities for the corporate device fleet.
- Developed shell scripts to audit and enforce security settings on Linux servers, ensuring adherence to hardening standards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
