HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Authored and deployed **Python** scripts to automate data ingestion and transformation for security analytics pipelines, processing approximately **1.5 million log events daily**.
- Developed and maintained **Java Spring Boot** microservices for internal tooling, implementing RESTful APIs with robust error handling and request validation.
- Contributed to the enhancement of a **payments operations dashboard** by implementing new monitoring alerts and refining transaction reconciliation workflows.
- Wrote and tuned **detection rules** in **Sigma** and **SPL** to identify suspicious activity across cloud environments, reducing alert noise by an estimated **20%**.
- Participated in the full lifecycle of **detection-as-code**, including version control with **Git**, CI integration via **Jenkins**, and automated testing for rule deployments.
- Analyzed adversary TTPs from threat intelligence reports and translated them into actionable telemetry requirements and new detection logic.
- Managed incident response workflows for P1/P2 alerts on enterprise applications, performing root cause analysis and documenting findings in **Confluence**.

SKILLS

Security Engineering – Detection Engineering, Incident Response, Threat Hunting, SIEM, EDR, SOAR, Detection-as-Code, TTPs, MITRE ATT&CK;, Sigma, KQL, SPL, YARA-L, EQL, Panther, LLM-based workflows

Cloud & Infrastructure – AWS, GCP, Azure, Kubernetes, Docker, Linux, EC2, S3, Lambda, CloudWatch

Programming & Scripting – Python, Java, Spring Boot, SQL, R, pandas, NumPy, scikit-learn, Bash Scripting

Data & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing, ETL, Splunk, Dynatrace

DevOps & CI/CD – Jenkins, Git, Jira, Confluence, Agile, Scrum, Change Management

PROJECTS

Cloud Security Detection Platform Enhancement

- Developed a set of **Python** scripts to automate the ingestion and normalization of AWS CloudTrail logs into a SIEM platform, improving detection coverage for IAM activities.
- Authored and implemented **Sigma** rules to detect common cloud attack patterns, such as privilege escalation and unauthorized access, achieving a **15% reduction** in false positives for critical alerts.
- Integrated detection rule deployment into a **Jenkins** CI/CD pipeline, enabling automated testing and safe rollout of new detection logic.

Automated Security Telemetry Enrichment

- Built a **Python** microservice using **FastAPI** to enrich security alerts with contextual data from various sources like user directories and asset inventories, reducing manual triage time by an average of **30%**.
- Designed and implemented data enrichment workflows that query **PostgreSQL** databases for user context and asset details, providing security analysts with immediate, actionable information during investigations.
- Contributed to defining telemetry requirements for detecting emerging threats, collaborating with senior security engineers to gather necessary log sources and data points.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
