PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Worked directly with enterprise customers to troubleshoot and resolve complex **API failures**, **integration challenges**, and **authentication errors**, providing end-to-end ownership through debugging logs and analyzing system behavior.
- Partnered closely with Engineering teams to troubleshoot, resolve, and proactively prevent recurring production incidents, acting as a critical escalation point for high-impact technical issues across distributed systems.
- Provided technical guidance and support to customers on deploying and maximizing value from AI products, developing expertise in platform capabilities and common integration patterns.
- Designed and implemented **Python scripts** to automate operational workflows and improve internal tooling, enhancing efficiency for the user operations team by an estimated **15%**.
- Contributed to the development of new approaches for scaling support in an AGI-driven future by identifying opportunities for automation and AI-powered workflows.
- Managed and debugged **Java Spring Boot** applications and REST APIs in a production environment, addressing P1/P2 incidents and implementing bug fixes with strict SLA adherence.
- Containerized **Java applications** using **Docker** for deployment to AWS EC2 instances, ensuring consistent environments across development and production.

SKILLS

AI/ML Platforms – OpenAI API, Codex, ChatGPT

Programming Languages – Python, Java, SQL

Backend Frameworks – Spring Boot, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Support & Operations – Troubleshooting, Incident Response, API Integration, Production Support, Log Analysis

Data Analytics – Power BI, Tableau, pandas, NumPy, scikit-learn

PROJECTS

Customer AI Integration Support Platform

- Developed a Python-based internal tooling suite to assist customer support engineers in diagnosing common API integration issues, reducing average resolution time by **20%**.
- Built **REST API clients** in Python to interact with customer environments for diagnostic data retrieval, improving the accuracy of root cause analysis for production incidents.
- Created comprehensive **runbooks and knowledge base articles** based on resolved customer issues, enabling faster onboarding for new support engineers and reducing escalation rates by **18%**.

Automated Production Incident Triage System

- Engineered a Python automation script that ingested logs from **Splunk and CloudWatch**, correlating events to automatically categorize and prioritize incoming production incidents.
- Integrated the script with **Jira** to auto-generate tickets with pre-populated diagnostic information, improving the efficiency of the incident response team by approximately **12%**.
- Implemented basic **machine learning** (scikit-learn) to identify anomalous log patterns, successfully flagging potential P1 incidents with **~0.78 precision** before they impacted end-users.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
