HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Configured and maintained **Prometheus** and **Grafana** for real-time monitoring of microservices, enabling rapid identification of performance bottlenecks.
- Developed **Python** scripts to automate the deployment and configuration of **Zabbix** agents across a fleet of 500+ Linux servers, reducing manual setup time by 40%.
- Implemented comprehensive logging pipelines using **Graylog**, aggregating logs from distributed applications and facilitating efficient troubleshooting of critical incidents.
- Designed and built service health dashboards in **Operations Bridge Manager (OBM)**, providing NOC teams with a consolidated view of system status and key performance indicators.
- Participated in post-incident reviews for P1/P2 incidents, performing root cause analysis and implementing corrective actions to prevent recurrence.
- Managed the lifecycle of observability components, including upgrades and patching of **Kubernetes**-based monitoring stacks, ensuring platform stability.
- Automated recurring system administration tasks on **Linux** environments using **Bash** scripting, improving operational efficiency for the platform team.

SKILLS

Monitoring & Observability – Prometheus, Grafana, Zabbix, Operations Bridge Manager (OBM), Network Node Manager (NNMi), Graylog, New Relic, Dynatrace

Cloud & Containerization – Kubernetes, Linux, AWS (EC2, S3, Lambda, CloudWatch)

Scripting & Automation – Python, Bash, Ansible, Terraform

ITSM & ITIL – Incident Management, Problem Management, Change Management, Configuration Management, CMDB

Networking – TCP/IP, SNMP, DNS, Syslog, APIs

PROJECTS

Automated Observability Stack Deployment (HCL Technologies)

- Engineered a **Terraform** module to provision and configure monitoring infrastructure on **AWS**, including instances for **Prometheus** and log aggregation agents.
- Developed **Python** scripts integrated with **Jenkins** CI/CD pipelines to automate the deployment and configuration of **Zabbix** and **Graylog** components in a hybrid cloud environment.
- Created standardized deployment patterns for observability tooling, enabling rapid setup for new application environments and reducing deployment lead time by approximately 30%.

Real-time Transaction Monitoring Dashboard (HCL Technologies)

- Built a **Java Spring Boot** application to ingest and process transaction data, exposing metrics via REST APIs for downstream monitoring systems.
- Configured **Dynatrace** dashboards to visualize transaction flow, alert on anomalies, and provide operational insights for financial services workflows.
- Collaborated with business analysts to define critical monitoring points and alert conditions, enhancing visibility into payment processing operations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
