HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed large and complex pharmacy claims, pricing, and contract datasets to identify financial drivers and reimbursement variances, informing strategic network pricing decisions for a portfolio of pharmacy partners.
- Developed and maintained analytical models in **Python** and **SQL** to forecast financial outcomes, quantify performance drivers, and support underwriting and operational decision-making for network economics.
- Translated complex pricing and reimbursement analysis into clear business narratives and actionable recommendations for senior stakeholders and cross-functional partners, influencing contracting strategy.
- Provided advanced financial analytics and strategic insight to support the Pharmacy Reimbursement strategy and client financial outcomes across a global healthcare organization.
- Collaborated with Network Contracting, Finance, and Operations teams to support effective decision-making and implementation of network pricing solutions.
- Contributed to process improvement initiatives, data stewardship efforts, and the adoption of modern data tools, including **AI-enabled analytics** capabilities.
- Containerized data analysis scripts using **Docker** and deployed them to **AWS EC2** instances, enabling reproducible and scalable execution of financial models and reporting.

SKILLS

Analytics & Modelling – Financial Modeling, Forecasting, Variance Analysis, Network Pricing, Pharmacy Reimbursement, Contract Analytics, Client Analytics, Commercial Decision Support

Data Analysis & Querying – SQL, Databricks, Python, R, pandas, NumPy, Scikit-learn, Data Warehousing, ETL

Reporting & Visualization – Power BI, Tableau, DAX, Power Query, Business Intelligence

Programming & Scripting – Python, Java, Spring Boot, REST APIs, SQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Pharmacy Network Pricing Optimization Platform

- Developed a **Python**-based analytics platform to process and analyze large pharmacy claims and contract datasets, identifying key drivers of reimbursement variance.
- Built interactive **Power BI** dashboards to visualize pricing trends and financial performance, enabling business stakeholders to understand complex network economics.
- Implemented automated data pipelines using **SQL** and **pandas** to ingest and transform data from disparate sources, ensuring data quality for downstream analysis.

Financial Forecasting Model for Reimbursement Strategy

- Engineered a predictive financial model in **Python** and **R** to forecast reimbursement outcomes based on historical claims data and contract terms.
- Performed rigorous statistical analysis and scenario modelling to assess the financial impact of different network pricing strategies, supporting strategic planning.
- Validated model outputs against actual financial results, achieving a forecast accuracy of approximately **92%** for key reimbursement metrics.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
