PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Performed hands-on testing and analysis of manufacturing components and finished systems, assessing **performance** and **efficiency** against engineering specifications.
- Collaborated with cross-functional teams to diagnose and resolve **production issues**, contributing to process improvements that reduced **rework rates by 15%**.
- Developed and maintained **technical documentation**, including detailed **work instructions** and **bills of materials** for new product lines.
- Executed systematic **root-cause analysis** on manufacturing defects, implementing corrective actions that improved overall product quality.
- Contributed to process improvement initiatives by gathering data from the **production line** and suggesting modifications for enhanced workflow.
- Managed **change-control processes** for system configuration updates, coordinating User Acceptance Testing (UAT) and post-implementation support.
- Containerised core Java Spring Boot services using **Docker** for consistent deployment across development and staging environments.

SKILLS

Engineering – Mechanical Aptitude, Electrical Problem-Solving, Production Support, Process Improvement, Root Cause Analysis, Technical Documentation, Work Instructions, Bills of Materials

Programming – Java, Spring Boot, Python, SQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Splunk, Dynatrace, Jira, Confluence, Linux, Shell Scripting

Data Analytics – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query

Methodologies – Agile, Scrum

PROJECTS

Manufacturing Process Optimisation Initiative

- Designed and implemented a structured testing framework for new electromechanical assemblies, identifying critical failure points early in the development cycle.
- Analyzed production data using **Python scripts** and **SQL queries** to pinpoint bottlenecks in assembly workflows, leading to a revised process that increased throughput by 12%.
- Documented revised assembly procedures and created visual aids to ensure consistent application by the production team.

Automated Reporting for Production Metrics

- Developed automated **Python scripts** to extract and aggregate data from multiple sources, including **PostgreSQL** databases and log files.
- Created interactive **Power BI dashboards** to visualize key production metrics such as defect rates, cycle times, and material yield, enabling faster decision-making for engineering leads.
- Performed data validation and cleansing using **Power Query** to ensure the accuracy and reliability of the reported figures.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
