PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and maintained project financial models, collecting and reconciling inputs from cross-functional teams including development, technical, procurement, finance, and power trading.
- Analyzed project revenues, costs, and returns for onshore wind, solar, and battery storage projects, executing sensitivity analyses to identify risks and opportunities.
- Supported the assessment of routes to market and power purchase agreements by analyzing bid economics for auction participation, preparing clear, accurate analysis for investment cases.
- Developed and maintained clear records of project assumptions, tracking their sources, changes, and outstanding requirements for ongoing financial modelling.
- Prepared concise charts and presentations to communicate complex financial analysis and supporting data to senior management and shareholders.
- Collaborated with experienced commercial colleagues to explain analytical findings and contribute to project discussions, developing expertise in electricity market concepts.
- Containerized Java Spring Boot applications using Docker and deployed them to AWS EC2 instances, ensuring efficient resource utilization and reliable service delivery.

SKILLS

Financial Analysis – Project Financial Models, Sensitivity Analysis, Bid Economics, Investment Decisions, Revenue Analysis, Cost Analysis, Return Analysis

Renewable Energy – Wind Power, Solar Power, Battery Storage, Electricity Markets, Power Purchase Agreements, Auction Participation

Data Analysis & BI – Excel, Financial Modelling, Data Reconciliation, Data Visualization, Chart Preparation, Presentations

Software Development – Java, Spring Boot, REST APIs, Docker, AWS EC2, SQL

Project Management – Agile Methodologies, Stakeholder Management, Cross-functional Collaboration, Timeline Management, Record Keeping

PROJECTS

Renewable Energy Project Financial Modelling

- Developed and maintained comprehensive financial models for a portfolio of wind, solar, and battery storage projects, incorporating detailed revenue streams, operational costs, and capital expenditure.
- Gathered and validated input data from development, engineering, and procurement teams, ensuring accuracy and consistency for all model assumptions and financial projections.
- Ran sensitivity analyses on key variables such as energy prices, operational efficiency, and construction costs, presenting findings to support investment decisions.

Power Purchase Agreement (PPA) Analysis Tool

- Designed and built a Python-based tool to analyze various Power Purchase Agreement structures and their impact on project returns.
- Integrated market price data and PPA terms into the tool to simulate revenue scenarios and assess commercial viability for different routes to market.
- Generated summary reports and visualizations to aid commercial teams in evaluating PPA options and auction bid strategies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
