PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed pension plan experience data to determine mortality and marital assumptions for longevity risk transfer transactions.
- Generated financial projections for underlying pension liabilities, supporting pricing for mid-market and jumbo pension risk transfer deals.
- Prepared simplification and transaction models to generate reinsured cashflows and fees for the longevity reinsurance 'flow' solution.
- Cleaned, consolidated, and updated pensioner data from materials provided by the front-end insurer to establish benefit design and data characteristics.
- Liaised with external clients and US-based colleagues to protect and leverage data for actuarial pricing and product development.
- Collaborated with international actuarial and business partners in a fast-paced, deal-focused environment to support pricing execution.
- Developed Python scripts to automate data cleansing and transformation tasks for large pensioner datasets, reducing manual processing time by **40%**.

SKILLS

Actuarial Science – Longevity Reinsurance, Pension Risk Transfer (PRT), Mortality Assumptions, Marital Assumptions, Financial Projections, Demographic Risks

Programming Languages – Python, SQL

Data Analysis & BI – Excel, Data Cleansing, Data Consolidation, Data Modelling, Data Visualisation

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Core Technologies – Java Spring Boot, REST APIs, PostgreSQL, MySQL, Oracle, Linux, Jira, Confluence

PROJECTS

Longevity Risk Pricing Model Enhancement

- Developed and refined a **Python-based analytical model** to price longevity risk transfer transactions, incorporating detailed mortality and demographic assumptions.
- Integrated automated data ingestion and validation routines using **SQL and pandas**, ensuring data integrity for over 50,000 pensioner records.
- Collaborated with business analysts to translate complex actuarial requirements into model parameters, improving the accuracy of fee determination by an estimated **15%**.

Pension Data Analysis and Reporting Automation

- Built automated ETL pipelines using **Python and SQL** to cleanse, stitch, and update pensioner data from disparate sources for a financial services client.
- Designed and implemented interactive **Power BI dashboards** to visualize key pension plan characteristics and identify data anomalies for over 10,000 policyholders.
- Generated scheduled summary reports on data quality and coverage for actuarial teams, reducing manual reporting effort by approximately **30%** per quarter.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
