PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Gathered and analyzed complex business and systems requirements to enhance operational performance for investment accounting systems, translating needs into actionable specifications.
- Designed and implemented comprehensive test plans, including developing test case matrices and executing tests, to validate system functionality against business requirements, documenting all results.
- Partnered closely with product owners, internal business partners, and developers throughout the software development lifecycle (SDLC) to deliver system enhancements.
- Supported and integrated with enterprise business systems, coordinating change management for configurations and managing post-go-live support across interconnected platforms.
- Developed Python scripts for automating data processing and generating scheduled reports, improving efficiency for operational workflows within the financial services domain.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, focusing on SLA adherence and P1/P2 incident response in a regulated environment.
- Designed and implemented REST APIs using **Java Spring Boot** for cross-system data exchange, incorporating request validation and circuit-breaker patterns to ensure service resilience.

SKILLS

Business Analysis – Requirements Gathering, Business Specifications, Systems Development Lifecycle (SDLC), Test Planning, Test Case Development, UAT Support

Data & Reporting – SQL, Excel, Power BI, Tableau, Cognos, Data Processing, Data Manipulation

Programming Languages – Python, Java, SQL

Development Tools & Platforms – Jira, Visio, Oracle, SQL Server, Jenkins, Git, Docker

Financial Services Domain – Investment Accounting, Fund Administration, Financial Data Analysis, Operational Performance Enhancement

PROJECTS

Investment Accounting System Enhancement

- Collaborated with stakeholders to define requirements for enhancing an investment accounting system, focusing on improving operational efficiency and data integrity.
- Developed detailed business specifications and designed mockups for new system features, ensuring alignment with regulatory compliance and audit trail requirements.
- Created and executed test cases to validate system changes, meticulously comparing actual versus expected results and documenting all findings for the development team.

Financial Operations Data Automation

- Automated routine data extraction and reconciliation processes using **Python** scripting, reducing manual effort by an estimated **15 hours** per week for the operations team.
- Developed SQL queries against **PostgreSQL** databases to validate transaction data and support scheduled reporting for financial operations, ensuring data accuracy for daily reporting cycles.
- Implemented basic monitoring and alerting for data pipeline jobs using **AWS CloudWatch**, ensuring timely notification of failures or performance degradation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
