PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Executed and coordinated **Workday HCM mass data loads**, including template preparation, validation, and error resolution for critical HR operational processes.
- Supported complex **HR data processes**, including compensation adjustments and employee lifecycle events, by validating data accuracy and resolving discrepancies with internal and vendor teams.
- Partnered with internal stakeholders and third-party vendors to confirm load readiness, review validation results, and escalate blockers to ensure timely operational execution.
- Identified and analyzed data issues and process gaps, working with partners to correct root causes and reduce repeat manual effort, improving data integrity across the HR systems.
- Maintained clear **process documentation**, checklists, and operating procedures to support consistency, auditability, and knowledge sharing for the People Services & Solutions team.
- Managed multiple operational priorities with a focus on accuracy, urgency, and downstream impact, ensuring critical **HR data management** tasks were completed on schedule.
- Containerized data processing scripts using **Docker** and deployed them to a cloud environment, ensuring consistent execution and simplifying deployment for automated data validation tasks.

SKILLS

HR Systems – Workday HCM, HR data loads, data validation, mass data loads, operational support

Data Management – Data accuracy, quality control, data processing, data analysis, root-cause analysis

Cloud & DevOps – Docker, Cloud deployment, CI/CD

Tools & Technologies – Excel, SQL, Python scripting, Jira, Confluence

Project Management – Process documentation, checklists, operating procedures, stakeholder coordination, cross-functional collaboration

PROJECTS

HR Data Operations Playbook Development

- Developed comprehensive documentation and checklists for Workday HCM data load processes, standardizing execution and reducing errors by an estimated 15%.
- Collaborated with HR Technology and Global People Services teams to map out data dependencies and validation steps for key compensation-related activities.
- Built Python scripts to automate initial data validation checks for mass upload templates, identifying and flagging common formatting issues before submission.

Automated HR Data Reconciliation Service

- Engineered a Python-based service to reconcile employee data between the HR system and downstream payroll vendor outputs, processing approximately 5,000 records weekly.
- Implemented SQL queries against an Oracle database to extract and compare employee demographic and compensation data, flagging discrepancies for manual review.
- Designed REST APIs using Flask to integrate the reconciliation service with existing HR reporting tools, providing on-demand data comparison capabilities.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
