HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Administered and optimized **Azure SQL Database** and **Azure SQL Managed Instance** across production and non-production environments, ensuring high availability and performance.
- Implemented comprehensive business continuity strategies using **zone redundancy**, automated backups, point-in-time restore, and active geo-replication for critical data assets.
- Monitored database health and performance using **Azure Monitor**, **Log Analytics**, and Query Store, proactively identifying and resolving resource contention and deadlocks.
- Secured Azure SQL services through **Microsoft Entra authentication**, managed identities, least-privilege access controls, and encryption, ensuring compliance with security policies.
- Executed migrations from on-premises **SQL Server** to Azure SQL Database, including discovery, compatibility assessment, remediation, and cutover planning.
- Drove cost optimization initiatives by right-sizing compute and storage, implementing capacity reviews, and leveraging Azure Hybrid Benefit where applicable.
- Collaborated with application and platform engineering teams on database design, connectivity, and deployment pipelines, ensuring production readiness for new features.

SKILLS

Azure SQL – Azure SQL Database, Azure SQL Managed Instance, elastic pools, vCore, General Purpose, Business Critical, Hyperscale, serverless

Database Administration – High Availability, Disaster Recovery, automated backups, point-in-time restore, failover groups, active geo-replication, zone redundancy

SQL Server Engine – T-SQL, Query Store, execution plans, indexing, statistics, blocking, deadlocks, query optimization

Azure Cloud Services – Azure Monitor, Log Analytics, Microsoft Entra ID, managed identities, Azure RBAC, Private Endpoints, network controls, encryption, auditing

Database Migration – SQL Server to Azure SQL, compatibility assessment, remediation, cutover planning, rollback planning

Observability & Performance – dynamic management views, enterprise observability tooling, performance tuning, resource contention troubleshooting

PROJECTS

Azure SQL Estate Optimization Project

- Optimized resource utilization for a fleet of **Azure SQL Managed Instances** supporting enterprise applications, reducing monthly cloud spend by **18%** through right-sizing and reservation analysis.
- Implemented automated backup and point-in-time restore capabilities for **production Azure SQL Databases**, ensuring adherence to a 7-day data retention policy and enabling rapid recovery.
- Developed T-SQL scripts to monitor and analyze query performance, identifying and tuning inefficient execution plans that were contributing to application latency.

SQL Server to Azure Migration Strategy

- Assessed on-premises **SQL Server** workloads for migration feasibility to **Azure SQL Database**, documenting compatibility issues and outlining remediation steps for 5 critical applications.
- Designed and documented a phased migration plan, including pre-migration testing, cutover procedures, and post-migration validation steps to minimize business disruption.
- Configured **Azure Monitor** and diagnostic settings for migrated databases to establish baseline performance metrics and set up proactive alerting for key health indicators.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
