PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Served as the primary technical data contact for customer implementations, directly engaging with client **Technical Specialists** and **Asset Managers** to gather aircraft and engine technical details, including maintenance status and AD/SB compliance.
- Owned the loading, mapping, and validation of customer **technical data** into the **Salesforce** and **LeaseWorks** platform modules, ensuring accuracy against source records before go-live.
- Designed data mapping strategies between customer legacy systems (spreadsheets, databases) and the LeaseWorks data model, collaborating with implementation and engineering teams to ensure seamless integration.
- Identified and resolved data gaps and inconsistencies in customer records by working closely with client-side technical teams, maintaining project timelines for implementation schedules.
- Developed and maintained working proficiency in **Salesforce** and **LeaseWorks** configuration, specifically focusing on technical and asset data structures for aviation operations.
- Documented data mapping decisions, local customizations, and data load procedures, creating handoff materials for the **Support/CS** team for ongoing system maintenance.
- Contributed to scoping conversations by advising on data readiness, required source materials, and realistic timelines for technical data loads within the aviation asset management domain.

SKILLS

Domain Expertise – Aircraft Technical Records, Continuing Airworthiness, Maintenance Management, Aircraft Leasing Technical Management, Aviation Domain Knowledge

Platform & Tools – Salesforce, LeaseWorks (Aeris Asset), Excel, Spreadsheets, Databases

Data Handling – Data Loading, Data Mapping, Data Validation, Data Reconciliation, Quality Assurance, Structured Data Sets

Process & Methodology – Customer Implementations, Technical Data Gathering, Gap Analysis, Change Management, Agile Methodologies, Requirements Gathering

Aviation Concepts – AD/SB Compliance, LLP Tracking, Maintenance Reserves, Technical Lease Provisions, Delivery/Redelivery Conditions, Maintenance Programs

PROJECTS

Aviation Asset Data Migration & Validation

- Managed the end-to-end migration of technical asset data for a pilot leasing company, mapping over 5,000 aircraft and engine records from legacy spreadsheets into a new operational platform.
- Developed automated validation scripts using **Python** and **SQL** to cross-reference loaded data against original source documents, identifying and rectifying discrepancies in maintenance reserve calculations, reducing manual checks by approximately 40%.
- Collaborated with client-side asset managers to define data transformation rules and ensure accurate representation of AD/SB compliance and LLP tracking within the target system.

Technical Records System Configuration & Training

- Configured the core technical data modules within a **Salesforce**-based platform to accurately reflect customer-specific maintenance program requirements and lease provisions.
- Documented detailed procedures for data entry and ongoing maintenance of technical records, creating training materials for customer technical specialists and asset managers.
- Conducted post-go-live training sessions for two client teams, demonstrating platform functionality and best practices for maintaining airworthiness compliance data.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
