PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **data discovery and classification** programmes for enterprise clients, encompassing scoping, sensitive data identification, and rollout strategies.
- Performed **data discovery and sensitivity assessments** across diverse structured and unstructured data estates, identifying and cataloging sensitive information categories.
- Contributed to **data protection and privacy risk assessments**, including the preparation of DPIA inputs and detailed data flow analysis for regulatory compliance.
- Developed and refined **data handling, retention, and information protection controls**, aligning them with client governance frameworks and security best practices.
- Supported the implementation and assessment of **Microsoft Purview** capabilities, focusing on data classification, sensitivity labeling, and information protection policies.
- Assisted in defining operating models and **control frameworks** for data security tooling, ensuring effective governance and management of data protection platforms.
- Analyzed data quality, provenance, and access controls in the context of emerging **AI readiness and AI risk assessments** for client engagements.

SKILLS

Data Security & Protection – Data Discovery, Data Classification, Sensitivity Labels, Information Protection, Data Loss Prevention, Data Handling, Data Retention

AI & Analytics Risk – AI Security, AI Risk Assessment, Data Quality, Data Provenance, Access Controls, AI Governance, EU AI Act Readiness

Data Governance & Risk Management – Data Governance, Data Risk, Risk Assessments, DPIA, Data Flow Analysis, Control Frameworks

Cloud & Security Platforms – Microsoft Purview, Varonis, Microsoft 365, Azure

Consulting & Delivery – Client Workshops, Stakeholder Sessions, Deliverable Production, Implementation Roadmaps, Cybersecurity Consulting

PROJECTS

Enterprise Data Classification Framework Development

- Designed and rolled out a comprehensive **data classification framework** for a large financial services client, categorizing data assets based on sensitivity and regulatory requirements.
- Developed **Python scripts** to automate the discovery and tagging of sensitive data across structured databases (**PostgreSQL**) and unstructured file shares, processing over 1TB of data.
- Collaborated with business stakeholders and operations teams to define data handling policies and integrated classification outputs into existing **IT security controls**.

AI Readiness Assessment for Data Security

- Conducted an **AI readiness assessment** for a client exploring advanced analytics, focusing on data quality, governance, and security implications of their AI initiatives.
- Analyzed data pipelines and existing **data security platforms** to identify risks related to data provenance and access controls in potential AI models, producing a risk register.
- Provided recommendations for enhancing data protection controls and establishing an **AI governance** structure to mitigate emerging security risks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
