HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** scripts for automating data ingestion and transformation processes, reducing manual effort by approximately **40%**.
- Designed and implemented **REST APIs** using **Java Spring Boot** for inter-service communication, handling over **2,000 requests** per minute in production.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within strict **SLA** targets using **Splunk** and **Dynatrace**.
- Wrote complex **SQL** queries and performed data validation for schema updates and ad-hoc reporting across **PostgreSQL** and **Oracle** databases.
- Participated in **Agile/Scrum** ceremonies, including sprint planning and daily stand-ups, contributing to defect tracking and resolution in **Jira**.
- Containerized backend services using **Docker** for consistent deployment across development and production environments.
- Collaborated with cross-functional teams to gather requirements and support User Acceptance Testing (UAT) for enterprise system integrations.

SKILLS

Languages – Python, Java, SQL, C/C++, Verilog, Tcl, Perl, Shell Scripting

Frameworks/Libraries – Spring Boot, Spring Cloud, Hibernate, JPA, scikit-learn, pandas, NumPy

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Linux, ARM Processors, RISC-V Processors

Methodologies – Agile, Scrum, CI/CD

Design – Computer Architecture, Digital Design, RTL Design, Low Power Design, Micro Architecture

PROJECTS

Automated Data Pipeline for Enterprise Reporting

- Engineered a **Python**-based ETL pipeline to extract, transform, and load data from multiple enterprise systems into a central data warehouse, processing approximately **50 GB** of data daily.
- Developed **SQL** scripts for data validation and schema management within the **PostgreSQL** database, ensuring data integrity for downstream reporting.
- Integrated the pipeline with **Jenkins** for automated scheduling and deployment, reducing report generation time from **6 hours** to **30 minutes**.

Microservice for Transaction Data Processing

- Built a **Java Spring Boot** microservice to process and validate incoming transaction records, designed to handle a peak load of **1,500 transactions** per second.
- Implemented **REST APIs** for seamless integration with existing enterprise backend services, ensuring data consistency across systems.
- Containerized the service using **Docker** and deployed it to an **AWS EC2** instance, establishing basic monitoring with **CloudWatch**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
