HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed end-to-end incident response for critical digital platforms, including **P1/P2 incident triage** and **root cause analysis**, ensuring adherence to strict SLAs.
- Developed **Python scripts** to automate data ingestion and reporting tasks, reducing manual effort for the operations team by approximately **15%**.
- Enhanced monitoring capabilities by configuring alerts and service health indicators using **Dynatrace**, proactively identifying potential degradations before customer impact.
- Collaborated with development teams to resolve complex L2/L3 incidents, implementing corrective actions and improving application stability.
- Maintained and updated operational **runbooks** and knowledge base articles, standardizing support procedures for the SRE team.
- Contributed to the continuous improvement of monitoring coverage and alert quality, refining thresholds and reducing alert noise by **20%**.
- Deployed and managed containerized applications using **Docker** on **AWS EC2** instances, ensuring consistent environments across development and production.

SKILLS

Observability & Monitoring – Dynatrace, Grafana, CloudWatch, Splunk, PagerDuty

Cloud Platforms – AWS (EC2, S3, Lambda), Azure, GCP

Languages & Scripting – Python, Java, SQL, Shell Scripting

DevOps & CI/CD – Jenkins, Git, Docker, Kubernetes, Agile Methodologies

Application Support & SRE – Incident Response, Root Cause Analysis, SLA Management, Runbooks, API Troubleshooting

PROJECTS

Digital Platform Health Monitoring Enhancement

- Implemented comprehensive monitoring dashboards in **Grafana** for key web and mobile applications, providing real-time visibility into performance and availability.
- Configured synthetic monitoring probes to simulate critical customer journeys, detecting issues like slow API responses and login failures before they impacted users.
- Developed automated alerting mechanisms integrated with **PagerDuty** to ensure rapid notification and response to critical incidents impacting digital services.

API Performance and Reliability Improvement

- Investigated and resolved performance bottlenecks in **Java Spring Boot** REST APIs supporting customer-facing applications, reducing p95 latency by **30%**.
- Analyzed distributed tracing data from **Dynatrace** to pinpoint inter-service communication issues within a microservices architecture.
- Collaborated with backend developers to implement resilience patterns, such as circuit breakers and retries, improving overall system stability during peak loads.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
