PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented multi-regional, highly available architectures on **AWS**, ensuring platform resilience and capacity.
- Automated core operational processes by developing **Python** scripts for infrastructure provisioning and self-healing solutions.
- Managed **Kubernetes** clusters and container orchestration using **Docker**, optimizing deployment efficiency and resource utilization.
- Built and maintained **CI/CD pipelines** using **Jenkins** and **Git**, facilitating automated testing and continuous deployment of infrastructure code.
- Implemented comprehensive **monitoring and alerting strategies** across observability platforms including **Dynatrace** and **Splunk**, defining key SLIs and SLOs.
- Led incident reviews and root cause analyses, developing operational standards and playbooks to enhance system reliability.
- Collaborated with cross-functional teams, including Developers and Cloud Engineers, to integrate new services and ensure operational readiness for platform releases.

SKILLS

Cloud Platforms – Azure Cloud Architecture, AWS Cloud

Containers & Orchestration – Kubernetes, Docker, Helm Charts, Istio

Infrastructure as Code – Terraform, Bicep, CloudFormation

CI/CD Tools – GitHub Actions, Jenkins, Argo CD

Observability & Monitoring – Dynatrace, Datadog, Splunk, AppDynamics, Prometheus, Grafana

Scripting – Python, PowerShell, Shell Scripting, Go

Core Fundamentals – Linux Administration, Networking Fundamentals, Incident Management & RCA

PROJECTS

Cloud Infrastructure Automation with Terraform and Kubernetes

- Developed **Terraform** modules to provision and manage multi-region **AWS** infrastructure, including VPCs, EC2 instances, and S3 buckets.
- Containerized applications using **Docker** and deployed them to a managed **Kubernetes** cluster (EKS), automating scaling and load balancing.
- Implemented **CI/CD pipelines** with **Jenkins** to automatically build, test, and deploy infrastructure changes, reducing manual deployment time by 40%.

Production Observability Enhancement for Enterprise Systems

- Integrated **Dynatrace** and **Splunk** for comprehensive monitoring and log aggregation of distributed Java Spring Boot applications, improving error detection rates by 30%.
- Designed and implemented custom alerts and dashboards in **Grafana** based on defined **SLOs**, enabling proactive issue identification for critical services.
- Automated log analysis using **Python** scripts to identify recurring patterns and potential performance bottlenecks across the production environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
