- Provided day-to-day technical support and configuration for **laboratory IT systems** within a regulated environment, ensuring operational continuity.
- Troubleshot and resolved diverse system issues including **user access problems**, complex software configurations, and inter-system data flow disruptions.
- Managed and maintained critical system settings, user roles, and security controls, adhering strictly to **compliance policies** and industry standards.
- Assisted with essential **database management tasks**, encompassing backups, performance monitoring, and routine troubleshooting to maintain data integrity.
- Supported **system validation activities**, contributing to testing, documentation, and periodic reviews to ensure system efficacy and compliance.
- Collaborated with external **vendors** to resolve technical issues and implement system enhancements, streamlining operational workflows.
- Developed and updated comprehensive **system documentation**, including standard operating procedures (SOPs) and user guides for laboratory personnel.

SKILLS

Laboratory Systems – LIMS, Empower, FTIR, UV

IT Support & Operations – Troubleshooting, System Maintenance, User Access Management, Configuration, Change Management, Audits, Compliance

Database Management – SQL, Database Backups, Performance Monitoring

System Validation – Testing, Documentation, SOP Creation, User Guides

Compliance & Standards – GMP, Data Integrity, Cybersecurity, Regulated Environments

PROJECTS

Laboratory Information Management System (LIMS) Support Enhancement

- Streamlined user access provisioning and de-provisioning processes for a **LIMS platform**, reducing average ticket resolution time by **30%**.
- Developed comprehensive **SOPs and user guides** for core LIMS functionalities, facilitating smoother onboarding for new laboratory staff.
- Assisted in troubleshooting data flow issues between the LIMS and connected laboratory instruments, ensuring accurate sample tracking.

Enterprise System Integration for Lab Operations

- Managed the configuration and maintenance of system settings connecting **laboratory applications** to broader enterprise systems, ensuring seamless data exchange.
- Supported testing and documentation for system upgrades, coordinating with IT infrastructure teams to minimize disruption to lab operations.
- Contributed to maintaining **database integrity** through regular monitoring and basic troubleshooting within the integrated system landscape.
