PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production support for critical enterprise systems, responding to P1/P2 incidents and ensuring SLA adherence using **Splunk** and **Dynatrace**.
- Developed Python scripts to automate ETL processes and generate scheduled reports, improving data processing efficiency for operational teams.
- Executed complex SQL queries across **PostgreSQL** and **Oracle** databases for data validation, reconciliation, and ad-hoc analysis, supporting system integrations.
- Engineered and deployed REST APIs using **Java Spring Boot** for cross-service communication, incorporating robust error handling and circuit-breaker patterns.
- Contributed to change-control management for enterprise systems, coordinating UAT and providing post-go-live support for system configuration updates.
- Monitored and troubleshot B2B integrations, web services, and scheduled data feeds, isolating failures using **Postman** and analyzing logs.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments across development and production.

SKILLS

Core Technologies – Java, Spring Boot, Python, SQL, REST APIs, Docker, Linux

Cloud & CI/CD – AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Monitoring & Support Tools – Splunk, Dynatrace, Jira, Confluence, Freshservice

Integration & Testing – Postman, JSON, XML, CSV

ERP & Business Systems – Infor CloudSuite (M3 ERP, Factory Track), B2B Integrations

Scripting & Automation – PowerShell, Bash

PROJECTS

ERP System Integration and Data Reconciliation

- Developed Python scripts to extract and transform data from legacy ERP modules into a standardized format for a new warehouse management system.
- Wrote complex SQL queries and performed data reconciliation between the old and new systems to ensure data integrity during the migration phase.
- Created automated reports using **Power BI** to visualize reconciliation discrepancies, reducing manual review time by approximately 30%.

API-Driven Transaction Monitoring Service

- Built a Java Spring Boot microservice to monitor transaction flows across multiple B2B integrations, consuming data via REST APIs.
- Implemented logging and alerting mechanisms using **AWS CloudWatch** to flag failed transactions and integration errors in near real-time.
- Designed and tested API endpoints using **Postman** to simulate integration scenarios and validate error handling logic for a financial services client.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
