PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed workforce capacity and resource planning for **8 international teams** across multiple product lines, ensuring alignment with business demands and vendor commitments.
- Developed operational reports and dashboards using **Power BI** and **SQL** to visualize key performance indicators, identifying trends in workload fluctuations and potential staffing bottlenecks for leadership review.
- Analysed operational data from diverse international sources to forecast future workloads, identifying staffing requirements and potential risks to service delivery for a global technology organization.
- Monitored operational performance and productivity metrics across distributed teams, proactively identifying backlogs and recommending process improvements to enhance efficiency.
- Collaborated with cross-functional teams, including Data Analytics, Workforce Planning, and Vendor Management, to ensure resource alignment with evolving business demands and project priorities.
- Managed projects focused on improving operational processes and service delivery, from initiation through to completion, coordinating efforts across international locations.
- Containerized and deployed operational reporting services on **AWS Lambda**, improving data processing efficiency and reducing query times for critical capacity planning dashboards.

SKILLS

Workforce Planning – Capacity Management, Resource Planning, Forecasting, Staffing Requirements, Workload Analysis

Project Management – Process Improvement, Project Initiation, Project Completion, Risk Identification, Stakeholder Management

Data Analysis & Reporting – Operational Data Analysis, Quantitative Data Interpretation, Trend Identification, Performance Monitoring, Productivity Metrics

Tools & Technologies – Power BI, SQL, Python, AWS Lambda, Jenkins, Jira, Confluence, Splunk, Dynatrace

Collaboration & Communication – Cross-functional Teams, International Teams, Vendor Management, Business Demands, Problem-Solving

PROJECTS

Global Operations Capacity Dashboard (HCL Technologies)

- Developed a comprehensive capacity planning dashboard using **Power BI**, integrating data from multiple international team backlogs and project pipelines.
- Designed and implemented **SQL** queries across PostgreSQL and Oracle databases to extract and transform operational data for forecasting workload fluctuations.
- Collaborated with operations and business analysts to gather requirements and refine reporting metrics, enabling proactive identification of resource gaps for an enterprise client.

Automated Resource Allocation Script (HCL Technologies)

- Engineered a **Python** script to automate the initial allocation of resources for new projects based on historical workload data and team capacity.
- Integrated the script with Jira and Confluence APIs to pull project scope and team availability, reducing manual allocation time by approximately **30%**.
- Scheduled script execution via Jenkins pipelines, ensuring timely updates to resource plans and improving overall project pipeline efficiency.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
