PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **network vulnerability remediation solutions**, encompassing assessment, prioritization, implementation, and validation for routers, switches, and firewalls.
- Executed **OS and firmware upgrades** for enterprise network devices, including configuration backups, service validation, and rollback procedures across a production environment.
- Managed **Windows and Linux server vulnerability remediation** efforts, including analysis of critical and emerging threats, and provided on-call support for related incidents.
- Automated the processing of **vulnerability data**, evidence collection, and pre/post-change validation checks using scripting and API integrations.
- Developed and maintained technical runbooks and standard operating procedures for **infrastructure hardening** and access control implementation in line with security benchmarks.
- Collaborated with cross-functional teams to integrate **network segmentation and access controls**, ensuring adherence to security policies and regulatory requirements.
- Performed **incident on-call support** and planned overnight/weekend maintenance for network device upgrades and patching initiatives.

SKILLS

Network Devices & Protocols – Routers, Switches, Firewalls, Load Balancers, DNS, DHCP, IPAM, OSI Model, VLANs, Spanning Tree, OSPF, BGP

Security & Vulnerability Management – Vulnerability Remediation, Infrastructure Hardening, Access Controls, CIS Benchmarks, Vendor Security Benchmarks, Qualys, Tenable, Rapid7, ServiceNow Vulnerability Response

Operating Systems & Platforms – Cisco IOS, Palo Alto Networks, Check Point, F5, Infoblox, Citrix NetScaler, Windows Server, Linux

Automation & Scripting – Ansible, REST APIs, Git, Python, Shell Scripting

Cloud & Reporting – Microsoft Azure Networking, Power BI

PROJECTS

Enterprise Network Device Hardening & Upgrade Initiative

- Led the upgrade of **network operating systems** across **150+ Cisco routers and switches**, ensuring configuration backups and rollback plans were in place for each device.
- Implemented **infrastructure hardening** measures on enterprise firewalls, including updating **access control lists** and disabling unnecessary services based on vendor security benchmarks.
- Developed automated scripts to validate network device configurations post-upgrade, reducing manual validation time by approximately **30%**.

Vulnerability Management Automation & Reporting Platform

- Designed and built a Python-based automation framework to ingest vulnerability scan data from **Tenable**, mapping findings to specific network assets.
- Developed **Power BI dashboards** to visualize vulnerability trends, track remediation progress across teams, and highlight critical risks to stakeholders.
- Integrated with an ITSM platform via REST APIs to automate ticket creation for identified vulnerabilities, improving workflow efficiency for the security operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
