PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Assisted in the creation and update of standard operating procedures (SOPs) and other technical documentation, ensuring adherence to quality standards.
- Performed routine data analysis to support investigations of out-of-specification (OOS) results, identifying trends and contributing to detailed investigation reports.
- Accurately documented all laboratory work, including experimental procedures, observations, and data, ensuring traceability and compliance.
- Executed batch release testing protocols, contributing to technical transfer activities and co-validation efforts to ensure product quality.
- Analyzed trends in operational data from a financial-services dashboard, identifying patterns in transaction flows and contributing to the resolution of ~150 failed payment alerts weekly.
- Supported enterprise business systems by managing change control processes for system configuration updates and coordinating user acceptance testing (UAT) across interconnected platforms.
- Containerized a Java Spring Boot microservice using Docker, configuring basic resource limits and deploying to an AWS EC2 instance via a Jenkins CI/CD pipeline.

SKILLS

Quality Control & Analysis – SOPs, Batch Release Testing, Technical Transfer, Co-validation, OOS Investigations, Trending Analysis, Documentation

Data Analysis & Reporting – Data Analysis, Report Writing, SQL, PostgreSQL, Python Scripting, Splunk, Dynatrace

Software Development – Java, Spring Boot, REST APIs, Python, Shell Scripting, Git, Jenkins

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Business Systems & Operations – ERP Integration, Change Management, Jira, Confluence, Agile Methodologies

Data Visualization & BI – Power BI, Tableau, DAX, Power Query, Data Modelling

PROJECTS

Financial Operations Dashboard Enhancement (HCL Technologies)

- Developed and maintained Python scripts to automate data ingestion and transformation for a financial-services operations dashboard, processing approximately 50,000 transaction records daily.
- Implemented new alerting mechanisms within the dashboard using Splunk queries to identify and flag anomalies in transaction processing, reducing manual oversight by 30%.
- Collaborated with business analysts to gather requirements for enhanced transaction monitoring features, contributing to improved reconciliation workflows.

MSc Data Analytics Applied Project: Customer Churn Prediction

- Engineered a feature set using Python (pandas, NumPy) from a customer transaction dataset of 150,000 records to predict churn probability.
- Trained a logistic regression model using scikit-learn on the extracted features, achieving an accuracy of 78% and an AUC of 0.72 on a held-out test set.
- Developed interactive Power BI dashboards to visualize customer segments and churn indicators, presenting findings to academic stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
