PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Researched and analyzed large datasets to identify data quality issues and resolve complex data-related problems for enterprise applications.
- Conducted web-based investigations to evaluate and validate information accuracy and quality across multiple online sources.
- Developed Python scripts to automate data extraction and transformation processes, improving reporting efficiency for operational teams.
- Designed and implemented data validation checks within SQL queries to ensure data integrity for financial services operations.
- Participated in software usability testing for internal business applications, providing actionable feedback to enhance user experience.
- Performed root cause analysis on identified data anomalies and escalated findings to senior engineers for resolution.
- Containerized data processing applications using **Docker** and deployed them to **AWS EC2** instances, ensuring consistent execution environments.

SKILLS

Data Analysis & Research – Data Validation, Trend Identification, Pattern Recognition, Online Research, Root Cause Analysis, Critical Thinking

Data Management – SQL (PostgreSQL, MySQL, Oracle), Data Quality, Data Integrity, Database Queries, Data Transformation

Programming & Scripting – Python, Shell Scripting

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker

Business Applications & Tools – Power BI, Tableau, Jira, Confluence, Microsoft Excel, Google Sheets

PROJECTS

Data Quality Improvement Initiative for Financial Operations

- Developed SQL scripts to identify inconsistencies and anomalies in transaction data streams, reducing manual data correction efforts by approximately 30%.
- Automated the generation of data quality reports using Python, providing weekly insights into data integrity issues for the operations team.
- Collaborated with business analysts to define data validation rules and implement checks within the reporting pipeline.

Web Data Aggregation and Analysis Tool

- Built a Python-based tool to scrape and aggregate data from various public websites, focusing on market trends and competitor analysis.
- Implemented data cleaning and transformation routines using pandas to prepare the aggregated data for analysis in Power BI.
- Created interactive Power BI dashboards to visualize key trends and patterns identified from the web data, supporting strategic decision-making.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
