PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and enhanced enterprise **SIEM platforms** and **security logging solutions**, ensuring operational stability and effective security monitoring capabilities for a financial-services client.
- Designed and implemented **security data processing solutions**, including log collection, transformation, and distribution across diverse technology environments, supporting incident response and threat detection.
- Led the integration of new **security data sources** from enterprise applications and cloud services, ensuring data accuracy and successful integration with existing monitoring platforms.
- Developed and maintained **technical standards**, operational documentation, and monitoring processes to support data quality, information retention, and **compliance requirements** (GDPR-aware).
- Contributed to the design and improvement of scalable, secure, and resilient logging infrastructure, including **capacity management** and service continuity capabilities.
- Resolved complex technical issues affecting security platforms, including **data ingestion**, connectivity, and system performance, collaborating with infrastructure and application teams.
- Containerized a **Python-based log processing service** using **Docker** and deployed it to an **AWS EC2 instance**, improving data routing efficiency by approximately 15%.

SKILLS

SIEM & Logging – SIEM platforms, Enterprise Logging Layer, Security Information and Event Management, Splunk, Microsoft Sentinel, Logstash, Cribl, Fluent Bit, Syslog, JSON, Windows Event Logs

Security Operations – Security Monitoring, Detection Engineering, Incident Response, Threat Intelligence, MITRE ATT&CK;, Security Governance, ISO 27001, NIST, GDPR

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Linux, Docker, Kubernetes, Infrastructure Automation, Version Control, High-Availability Architecture, Disaster Recovery

Scripting & Automation – Python, PowerShell, REST APIs, Shell Scripting, Cron Jobs, Jenkins Pipelines, Git

Data Processing & Analysis – Data Collection, Data Transformation, Data Filtering, Data Distribution, Data Pipelines, ETL, Data Warehousing, SQL (PostgreSQL, MySQL, Oracle)

Enterprise Systems – Enterprise Applications, Identity Platforms, ERP Systems, Change Management, Production Support, SLA Management

PROJECTS

Enterprise Security Telemetry Platform (HCL Technologies)

- Engineered a centralized logging infrastructure for a financial-services client, ingesting security telemetry from **Windows, Linux, and cloud services** into a **Splunk** SIEM.
- Developed **Python scripts** to automate the parsing and normalization of diverse log formats, reducing manual data preparation effort by an estimated **20%** for new data sources.
- Implemented automated alerts and dashboards within the SIEM to monitor critical security events and system health, facilitating faster incident triage for the operations team.

Automated Log Enrichment Service (HCL Technologies)

- Built a **Python Flask application** to enrich security logs with contextual data (e.g., user identity, asset information) before routing to the enterprise SIEM.
- Integrated the service with internal databases and REST APIs to retrieve enrichment data, processing approximately **5,000 log events per hour** during peak periods.
- Containerized the application using **Docker**, enabling consistent deployment across development and production environments on **AWS EC2**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
