PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Acted as the technical "North Star" for sales teams, translating complex customer business objectives into practical, value-driven Salesforce solutions for enterprise clients.
- Developed and delivered custom solution demonstrations showcasing **Generative AI** capabilities and **Data Cloud** integrations to C-suite executives and technical stakeholders, addressing unique business challenges.
- Led the solutioning cycle from discovery to close in collaboration with sales, product, and professional services teams, ensuring technical strategy aligned with business outcomes for complex deals.
- Articulated the value proposition of the Salesforce platform and AI-driven solutions to diverse audiences, from IT administrators to senior leadership, utilizing industry-specific insights.
- Maintained expert-level knowledge of **Salesforce products**, **AI trends**, and industry advancements, continuously learning and applying new features to customer engagements.
- Designed and implemented end-to-end solution architectures on the **Salesforce platform**, integrating various cloud services to meet specific customer requirements and drive business transformation.
- Containerized and deployed backend services using **Docker** and managed them on **AWS EC2** instances, ensuring scalability and reliability for customer-facing applications.

SKILLS

Salesforce – AI CRM, Data Cloud, Agentforce, Trailblazer

AI & Machine Learning – Generative AI, LLMs, Agentic Workflows

Technical Consulting – Solution Engineering, Presales, Technical Advisor, Discovery, Solutioning

Cloud & SaaS – Cloud Architecture, Subscription Models, Enterprise Software

Programming & Data – APIs, Data Modeling, Software Development, Python, SQL, Java

PROJECTS

AI-Powered Customer Engagement Solution

- Developed a proof-of-concept solution demonstrating how **Generative AI** and **LLMs** could automate customer support responses, reducing average handling time by an estimated **18%**.
- Built a Python-based integration layer to connect customer data sources with a vector database for a Retrieval-Augmented Generation (RAG) system, enabling context-aware AI responses.
- Presented the solution architecture and business impact to a prospective enterprise client's executive team, highlighting potential ROI and efficiency gains.

Salesforce Data Cloud Integration for Financial Services

- Designed and implemented a data model within **Salesforce Data Cloud** to unify disparate customer data streams for a financial services client, enabling a 360-degree customer view.
- Developed **ETL pipelines** using Python scripts to ingest and transform transactional data from legacy systems into the Data Cloud format, processing approximately **5,000 records per hour**.
- Collaborated with client business analysts to define key segmentation criteria and reporting requirements, ensuring the integrated data directly supported strategic sales initiatives.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
