PROJECTS

Loan Operations Processing Enhancement (HCL Technologies)

- Enhanced the processing of bank debt activities within the **Geneva Fund Accounting system** by developing new workflows for interest payments and rate resets, improving processing speed by **12%**.
- Implemented stricter data validation checks for loan asset master information, reducing data entry errors by approximately **8%** and improving the accuracy of static level data.
- Documented comprehensive operational procedures for processing various loan-related activities, serving as a key resource for new hires and ensuring consistent adherence to controls.

Financial Reporting Data Integrity Project (HCL Technologies)

- Developed automated **SQL queries** to extract and validate data for daily, weekly, and monthly financial reports, reducing manual data reconciliation effort by an estimated **18%**.
- Collaborated with business analysts to refine reporting requirements, ensuring that the generated reports provided accurate and transparent administrative services and client deliverables.
- Resolved complex data discrepancies identified during report generation, coordinating with multiple internal teams to trace data flows and implement corrective actions.
