PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and executed dynamic application security testing (DAST) strategies, identifying and triaging over **150 security vulnerabilities** across enterprise applications.
- Analyzed software requirements and solution architectures to design comprehensive security test plans, scenarios, and coverage reports for multiple project streams.
- Collaborated with development and architecture teams to investigate reported vulnerabilities, providing detailed remediation guidance and verifying fix implementations.
- Performed manual security testing and penetration testing activities, focusing on REST and SOAP web services/APIs to uncover potential security gaps.
- Integrated security testing activities into existing **Agile** and **DevOps** workflows, contributing to the implementation of **CI/CD** pipelines for continuous security assessment.
- Documented and reported on security testing progress, findings, risks, and outcomes to project teams and stakeholders using **Azure DevOps** for defect tracking.
- Contributed to the continuous improvement of security testing processes and automation, researching and adopting new security testing best practices.

SKILLS

Security Testing – Dynamic Application Security Testing (DAST), Manual Security Testing, Penetration Testing, Vulnerability Analysis, Risk Triage

API Testing – REST, SOAP, Postman, SoapUI

Development Methodologies – Agile, DevOps, CI/CD, DevSecOps

Tools & Platforms – Azure DevOps, Octane, Jenkins, Git, Linux

General – Analytical Skills, Problem-Solving, Communication, Test Planning, Reporting

PROJECTS

Enterprise Application Security Assessment

- Executed DAST scans using industry-standard tools, identifying and documenting critical and high-severity vulnerabilities within a Java Spring Boot application.
- Developed detailed security test cases and scenarios based on application architecture, focusing on authentication, authorization, and data input validation.
- Collaborated with the development team to prioritize remediation efforts, reducing the number of open critical vulnerabilities by **40%** before release.

API Security Testing Framework Development

- Designed and implemented a reusable security testing framework for REST APIs using **Python** and libraries like **Postman** for automated test execution.
- Integrated the API testing framework into a **Jenkins** CI/CD pipeline, enabling automated security checks on every build and deployment.
- Conducted security testing on SOAP web services, identifying common vulnerabilities such as injection flaws and insecure data exposure.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
