HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Triaged vulnerability alerts from security tools and external intelligence feeds, identifying and escalating high-risk findings impacting **critical infrastructure**.
- Configured and executed **network, infrastructure, and application vulnerability scans** using enterprise security tools, validating findings through manual testing.
- Collaborated with **Cyber Security, Infrastructure, and technology teams** to coordinate vulnerability remediation activities, ensuring adherence to required timelines.
- Assisted in the production of periodic **vulnerability management reports** and statistics for senior management, highlighting key risk areas and remediation progress.
- Tuned **vulnerability management tools** to enhance detection coverage and reduce false positives, improving overall process efficiency by an estimated **15%**.
- Reviewed security processes and identified opportunities to strengthen **security controls** and improve vulnerability management workflows.
- Maintained up-to-date **security documentation, procedures, and knowledge articles** for the Cyber Security team.

SKILLS

Security Principles – Vulnerability Management, Cyber Security, Information Security, Network Security, Attack Surface Risk Modeling, Security Controls, Threat Intelligence, Threat Hunting, Incident Response

Tools & Technologies – Vulnerability Scanners, Security Tools, Intrusion Prevention Systems, Splunk, Dynatrace, CloudWatch, Jenkins, Git, Jira, Confluence

Networking – Firewalls, Proxy Servers, Access Controls, Network Traffic Analysis

Endpoint Security – Anti-virus, Malware Protection, Security Monitoring Solutions

Programming & Scripting – Python, Java, SQL

Cloud & Infrastructure – AWS, Linux, Docker

PROJECTS

Enterprise Application Security Assessment

- Conducted comprehensive vulnerability assessments for a suite of **Java Spring Boot applications** hosted on AWS, identifying critical security flaws.
- Developed Python scripts to automate the parsing of security scan reports, correlating findings and prioritizing remediation efforts, reducing manual analysis time by **30%**.
- Collaborated with development teams to implement security patches and validate remediation success, ensuring adherence to **production environment** security standards.

Automated Security Alert Triage System

- Engineered a Python-based system to ingest and triage security alerts from multiple sources including **Splunk and external threat feeds**, classifying severity based on predefined rules.
- Integrated the system with Jira to automatically create tickets for high-priority vulnerabilities, streamlining the workflow for the **Cyber Security team** and reducing alert backlog by approximately **20%**.
- Designed and implemented basic reporting features to track alert volume and triage efficiency, providing insights for process improvement.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
