HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **ETL processes** using Python scripts to extract data from various sources for scheduled reporting and data pipelines, processing approximately **30 GB** of data daily.
- Designed and optimized **SQL queries** and stored procedures in PostgreSQL and Oracle for data validation and transformation, reducing query execution times by an average of **20%**.
- Performed data validation, mapping, and quality checks as part of **ETL workflows** for enterprise business systems, ensuring data integrity across integrated platforms.
- Monitored **ETL jobs** and **production environments** using Splunk and Dynatrace, troubleshooting failures and resolving data-related issues to maintain service level agreements.
- Collaborated with business analysts and operations teams to understand data requirements and translate them into technical specifications for **data integration workflows**.
- Implemented incremental and full load strategies for data warehousing, including **SCD Type 1 and Type 2** implementations, to support analytical reporting needs.
- Managed change-control processes for system configuration updates and coordinated User Acceptance Testing (UAT) for enterprise systems and cross-system integrations.

SKILLS

ETL Tools – Informatica, SSIS, Talend, Azure Data Factory

Databases – Oracle, SQL Server, PostgreSQL, MySQL

SQL – Complex Queries, Joins, Stored Procedures, Data Warehousing Concepts, Fact Tables, Dimension Tables, Star Schema, Snowflake Schema

Scripting & OS – Unix/Linux Commands, Shell Scripting

Data Concepts – ETL Concepts, Data Validation, Data Mapping, Data Quality Checks, SCD Type 1, SCD Type 2, Incremental Loads, Full Loads

Programming – Python, Java, Spring Boot

Cloud & Tools – AWS, Docker, Jenkins, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Automated Data Ingestion Pipeline for Financial Operations

- Engineered a **Python-based ETL pipeline** to automate data extraction from multiple disparate sources, including transactional logs and operational databases, for a payments operations dashboard.
- Implemented robust data validation and transformation logic using **pandas** and **SQL**, ensuring data consistency and quality for downstream reporting and analysis of ~3,200 daily transaction records.
- Scheduled and monitored data ingestion jobs using **cron** on Linux servers, maintaining reliable data flow for critical operational metrics and alerting systems.

Data Warehouse Schema Design and ETL Strategy

- Designed a **Star Schema** data warehouse model to support analytical queries for enterprise business systems, defining **Dimension Tables** and **Fact Tables** for key business processes.
- Developed **ETL scripts** in SQL and Python to populate the data warehouse, implementing strategies for handling **SCD Type 2** changes and incremental data loads from source PostgreSQL and Oracle databases.
- Performed data mapping and transformation to align source system data with the target warehouse schema, supporting the creation of business intelligence dashboards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
