PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Investigated security events across SIEM and SOAR platforms, correlating alerts from customer and corporate environments to identify anomalous behavior and potential threats.
- Designed and implemented new alerts within our SIEM to monitor for suspicious activity, reducing false positives by **18%** through refinement of detection rules.
- Developed operational response 'playbooks' for common security events, standardizing incident triage and initial containment procedures for a team of 5 engineers.
- Performed endpoint, network, and log analysis to initiate reactive threat hunting engagements, uncovering a previously unknown command-and-control channel.
- Collaborated with product and corporate teams to translate insights from security investigations into actionable requirements for new security feature implementation.
- Built and maintained Python scripts for automating data collection and analysis from various log sources, accelerating incident investigation timelines by **30%**.
- Containerized security tooling using **Docker** and deployed to an **AWS** environment, ensuring consistent and scalable execution for analysis tasks.

SKILLS

Security Operations – SIEM, SOAR, Incident Response, Threat Hunting, Malware Analysis, Forensics, Network Security, Web Application Security

Cloud & Infrastructure – AWS, Google Cloud Platform, Kubernetes, Container Security, Infrastructure as Code

Programming & Scripting – Python, Go, JavaScript, Bash

Protocols & Networking – TCP/IP, UDP, IPSEC, HTTP/HTTPS

Methodologies & Concepts – Threat Intelligence, Red Teaming, Purple Teaming, Cyber Deception, Agile

Tools & Technologies – Splunk, Dynatrace, Jenkins, Git, Jira, Confluence

PROJECTS

Security Incident Response Playbook Development

- Authored and iterated on 15+ detailed 'playbooks' for responding to common security incidents, covering scenarios from phishing to suspected data exfiltration.
- Integrated automated response actions into SOAR platform workflows, reducing manual intervention time by an average of **40%** for critical alert types.
- Conducted tabletop exercises with the security operations team to validate playbook effectiveness and identify areas for improvement in our incident handling process.

Automated Log Analysis for Threat Detection

- Developed Python scripts to parse and analyze large volumes of logs from AWS CloudTrail and application servers, identifying suspicious access patterns.
- Built a data pipeline using Pandas and NumPy to aggregate and correlate events, enabling faster identification of potential compromise indicators.
- Configured alerts in Splunk based on the output of the Python analysis scripts, improving detection rates for specific types of anomalous user behavior.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
