PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and configured control narratives and operating strategies for intelligent Building Management Systems (BMS) to optimize energy efficiency and occupant comfort.
- Programmed BMS controllers and devices, ensuring coordinated operation across mechanical and electrical building services like HVAC and water systems.
- Developed intuitive, user-friendly graphical interfaces (GUIs) for end-users to monitor and interact with building management systems.
- Collaborated with project stakeholders, including design managers and project teams, to capture client requirements for BMS functionality.
- Produced clear testing documentation for software factory acceptance testing (SFAT) and site acceptance testing (SAT), verifying system operation and diagnosing faults.
- Maintained accurate records of BMS design works, revisions, and modifications, ensuring robust document control throughout project lifecycles.
- Contributed to the continuous improvement of standard control strategies and internal design tools, providing technical guidance to junior team members.

SKILLS

BMS Platforms – Trend, Distech, Tridium (Niagara), ALC, Saia Burgess, CODESYS, Phoenix Contact, WAGO

Programming Concepts – Control Narratives, Sequences of Operation, Programming BMS Controllers

Building Technology – HVAC, AHUs, FCUs, Chilled Water Systems, Boilers, Pumps, Valves, Sensors

Documentation & Tools – GUI Development, CAD Drawings, Technical Documentation, Change Management, Document Control

Core Engineering – Problem-Solving, Analytical Skills, Attention to Detail, Written and Verbal Communication

PROJECTS

BMS Control Strategy Development for Enterprise Client

- Engineered detailed control narratives and system logic for a large-scale BMS implementation, focusing on optimizing HVAC plant operation for a major enterprise client.
- Developed and tested sequences of operation for air handling units and chilled water systems, integrating sensor feedback to maintain specified environmental conditions.
- Created technical documentation outlining system interfaces and communication protocols for integration with third-party building services.

GUI Configuration for Building Services Monitoring

- Designed and configured user-friendly graphical interfaces (GUIs) for a BMS platform, enabling operational teams to effectively monitor and manage building services.
- Mapped system data points and defined graphical elements to represent real-time status of HVAC components, water systems, and energy consumption metrics.
- Performed internal testing and validation of GUI configurations against functional requirements, ensuring accurate data visualization and user interaction.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
