HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **ADR capabilities** using runtime application security monitoring and threat detection tools, integrating with enterprise applications and security tooling across **AWS** and **Azure** environments.
- Analyzed application telemetry, logs, and security events from **ADR solutions** to identify malicious activity, investigate security incidents, and detect attack patterns across the enterprise application portfolio.
- Collaborated with application development teams to triage, prioritize, and remediate security findings, threats, and attack indicators detected within applications, reducing average remediation time by **18%**.
- Developed and operationalized **use cases and detection logic** for ADR platforms, improving visibility into application-layer threats and reducing response times by approximately **15%**.
- Partnered with Engineering, Security Operations, and Application Development teams to implement and operationalize **DevSecOps processes** and ADR technologies, ensuring effective integration.
- Managed the deployment, onboarding, and operational support of **runtime application security monitoring** platforms, ensuring effective integration with enterprise applications and security tooling.
- Authored **operational procedures and technical documentation** for ADR, AppSec, and DevSecOps, supporting internal and external audits by providing process adherence evidence.

SKILLS

Application Security – AppSec, ADR, DevSecOps, SAST, DAST, SCA, API Security, Container Security, Secure SDLC, OWASP Top 10, API security risks

Cloud & Infrastructure – AWS, Azure, Kubernetes, Terraform, Ansible, Infrastructure as Code (IaC)

Programming & Scripting – Java, .NET, Python, Node.js

Security Technologies – Runtime Application Self-Protection (RASP), Web Application and API Protection (WAAP), Threat Detection, Incident Response

Operations & Monitoring – Application telemetry analysis, Log analysis, Security event analysis, CI/CD, Agile Development, Scrum

Communication & Leadership – Technical leadership, Stakeholder communication, Documentation, Reporting, Metrics

PROJECTS

Enterprise Application Security Monitoring Platform

- Designed and deployed a **centralized logging and monitoring solution** for enterprise applications using **Splunk** and **CloudWatch** to enhance threat detection capabilities.
- Developed **Python scripts** for automated log analysis and anomaly detection, correlating security events across multiple application tiers to identify potential breaches.
- Implemented **alerting mechanisms and dashboards** to provide real-time visibility into application-layer security events for the operations and security teams.

Secure Software Development Lifecycle (SSDLC) Integration

- Integrated **SAST and DAST tools** into the Jenkins CI/CD pipeline for automated security testing of Java Spring Boot applications, identifying over **60 critical vulnerabilities** in initial scans.
- Developed **API security use cases** and detection logic for a new microservices platform, reducing the attack surface exposed via REST APIs.
- Collaborated with development teams to incorporate **secure coding practices** and remediate findings, improving the overall application security posture.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
