PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Participated in the delivery of the Information Security Program, focusing on **Enterprise Vulnerability Management** and **Risk Reporting** across diverse IT environments.
- Monitored and investigated information security vulnerabilities identified through internal and external scanning processes, leading to the classification and follow-up of critical issues.
- Researched emerging **vulnerabilities and threats**, compiling technical and non-technical reports for management to inform strategic security decisions.
- Automated data collection and reporting for vulnerability management processes using **Python scripting**, reducing manual effort by an estimated **30%**.
- Contributed to the enhancement of existing processes within the Vulnerability Management team, aligning with the Digital Enterprise model for improved efficiency.
- Investigated and reported on information security vulnerabilities across both **infrastructure and application environments**, collaborating with relevant teams for remediation.
- Managed internal and external **vulnerability scanning processes**, ensuring comprehensive coverage and timely identification of potential security weaknesses.

SKILLS

Security Concepts – Information Security Principles, Protocols, Practices, Industry Standards, Vulnerability Management, Threat Management, Risk Reporting

Core IT & Networking – Internet, Networking, Software, Hardware, IT Architecture

Tools & Technologies – ServiceNow, MS Office (Word, PowerPoint, Excel), Splunk, Dynatrace, Jenkins, Git

Programming & Scripting – Python, Java, SQL

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Linux, Docker

PROJECTS

Automated Security Incident Triage System

- Developed a **Python**-based system to automate the initial triage of security alerts from **Splunk**, categorizing incidents and flagging high-priority issues for faster response.
- Integrated the system with **Jira** to automatically create tickets for P1/P2 incidents, improving workflow efficiency for the security operations team by approximately **20%**.
- Designed and implemented REST APIs using **Flask** for programmatic interaction with the security monitoring tools, enabling seamless data exchange.

Vulnerability Assessment & Reporting Framework

- Built a framework using **Python** and **SQL** to aggregate vulnerability scan data from multiple sources, facilitating comprehensive analysis and reporting.
- Created automated reports detailing identified vulnerabilities, their severity, and potential impact, which were presented to management stakeholders weekly.
- Applied **data modelling** techniques to structure vulnerability data for efficient querying and trend analysis, supporting informed decision-making for security investments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
