PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Maintained production reliability and performance for a hybrid **SaaS platform** spanning **Windows** and **Linux** environments, focusing on availability and incident response.
- Enhanced system observability by integrating **centralized logging** and custom telemetry, identifying monitoring gaps and proactively addressing potential issues before they impacted service.
- Automated repetitive operational tasks and system configuration updates using **Python scripting** and **Bash**, reducing manual effort and improving deployment consistency.
- Managed and optimized **relational databases** including **PostgreSQL** and **Aurora**, focusing on query tuning, replication, and high availability configurations.
- Operated and debugged containerized workloads on **AWS**, including services like **Lambda** and **DynamoDB**, ensuring efficient resource utilization and performance.
- Developed and maintained **CI/CD pipelines** using **Jenkins** and **Git**, facilitating streamlined application deployments and infrastructure updates.
- Participated in an on-call rotation, troubleshooting complex production incidents across **.NET** applications hosted on **IIS** and cloud-native infrastructure, contributing to detailed **postmortems** and preventative actions.

SKILLS

Infrastructure as Code – Terraform, Ansible

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, IAM, DynamoDB, Aurora, Redshift), OpenStack

Containerization & Orchestration – Kubernetes, Docker

Operating Systems – Linux, Windows Server

Databases – SQL Server, PostgreSQL, MySQL, Aurora

Programming & Scripting – Python, Bash, PowerShell, .NET Framework, .NET Core

CI/CD & Observability – Jenkins, Terraform, Ansible, Kibana, Elasticsearch, CloudWatch, centralized logging

PROJECTS

Hybrid Cloud Infrastructure Automation (HCL Technologies)

- Automated the provisioning and configuration of hybrid cloud infrastructure using **Terraform** and **Ansible**, supporting both **Linux** and **Windows** environments.
- Developed reusable Terraform modules for **AWS** resources including **EC2** instances and **S3** buckets, enabling consistent and repeatable deployments.
- Integrated infrastructure automation with **Jenkins** pipelines to provide self-service infrastructure provisioning for development teams.

Production Incident Response & Observability Enhancement (HCL Technologies)

- Implemented enhanced monitoring and alerting for critical production services using **Splunk** and custom telemetry, reducing Mean Time To Detect (MTTD) by approximately **30%**.
- Developed **Python** scripts to automate log aggregation and analysis from distributed systems, facilitating faster root cause identification during incidents.
- Contributed to post-incident reviews, documenting findings and driving implementation of preventive measures to improve system resilience.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
